COURSE NAME:  GISC 1470.001: Geospatial Systems I - 4 sem. hrs.
GISC 1470.201: Geospatial Systems I Laboratory

INSTRUCTOR: Mr. Richard Smith
Office: CBI 113, Phone: (361) 825-2750
Email: Richard.Smith@tamucc.edu

CONSULTATION: 9:00 AM – 11:00 AM Tuesday,
2:30 PM – 3:30 PM Thursday or by appointment.
Virtual Office Hours: http://vyou.com/RickSmith

LECTURE TIMES: Tuesday 12:30PM – 1:45PM and Thursday 12:30PM – 1:45PM
LECTURE LOCATION: CS 101

LABORATORY TIME: Tuesday 9:00AM - 11:50AM or Thursday 2:30PM – 5:30PM
LABORATORY LOCATION: CI 226

COURSE WEBSITE: The Island Online (IOL) at: http://iol.tamucc.edu

COURSE DESCRIPTION:

LEARNING OBJECTIVES:
1. Understand the principle concepts of geographic information systems and science
2. Be familiar with the concepts of geography
3. Be familiar with the software used to execute geospatial reasoning and analysis
4. Be familiar with basic cartographic principles
5. Be familiar with areas of application of geographic information systems

REQUIRED TEXTS:

COURSE REQUIREMENTS:
Course requirements include the following:
1. Attendance at lecture and participation in class discussion.
2. Completion of assignments by scheduled due dates.
3. Completion of exams by scheduled due dates.
4. Completion of labs by scheduled due dates.
EVALUATION:
1. Exam 1: 15%
2. Exam 2: 18%
3. Exam 3: 20%
4. GIS Application Papers: 10%
5. Laboratory assignments: 35%
6. Course Portfolio: 2%
TOTAL: 100%

GRADE COMPUTATION:
A  
B  
C  
D  
F
≥90
≥80 and <90
≥70 and <80
≥65 and <70
<65

DUE DATES:
All assignments must be completed on time. Submission of an assignment after the due date is accepted, but with a penalty of 30% of the grade for the first 24 hours late, and 10% each additional 24 hours.

COURSE PORTFOLIO
Purpose:
In an effort to meet the needs of industry in students being prepared to produce professional presentation of work conducted, the instructor is requiring a professional portfolio be submitted at the end of the semester.

Requirement:
All students will submit portfolio in a bound binder at the beginning of the final examination period. The portfolio will be graded and returned when you submit your final examination. The portfolio counts as 2% of your total final grade.

Format:

<table>
<thead>
<tr>
<th>Chapter</th>
<th>Content</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Course Summary – at least ½ page discussing your experience and materials learned in course.</td>
</tr>
<tr>
<td>2</td>
<td>Laboratories</td>
</tr>
<tr>
<td>3</td>
<td>Application Papers</td>
</tr>
<tr>
<td>4</td>
<td>Exams</td>
</tr>
<tr>
<td>5</td>
<td>Optional: Class notes</td>
</tr>
<tr>
<td>6</td>
<td>Optional: Digital media</td>
</tr>
</tbody>
</table>
GIS APPLICATION PAPERS:
All students must review five application areas of GIS. The application reviews can be prepared from published literature, WWW, and other media. At least three of the reviews must come from peer-reviewed journals or trade publications. Each application review will consist of a one-page summary and critique of the published article and must adhere to the following requirements:

Format:
1. 1” margins, double-spaced, Times New Roman font, 12pt.
2. Title
3. Name, course, assignment type and number in the upper margin.

Title:
Provide a descriptive title explaining the content of the application you are reviewing.
(centered, top of page)

Paragraph One:
Introductory paragraph describing the problem being addressed (1/3 page maximum)

Paragraph Two:
Central paragraph describing the GIS solution to the problem; including description of software, hardware, data, data models, algorithms, models as appropriate. “What did they do to solve the problem?”

Paragraph Three:
Conclusion paragraph documenting your evaluation of GIS as the tool to solve the problem; is the correct data, software, hardware, data model...correct. Why or why not?

Reference:
Source of information in lower margin.

Potential sources for articles:
Cartography and Geographic Information Science
GeoInformatica
International Journal of Geographical Information Science
International Journal of Spatial Data Infrastructures Research
Transactions in GIS
Computers and Geosciences
Auto-Carto
Computers, Environment, and Urban Systems
Journal of Geographic Information and Decision Analysis
Journal of Geographical Systems

You can access these journals by clicking the “Find Articles” button on the library website: http://rattler.tamucc.edu or by visiting the library on campus.
COURSE OUTLINE:

<table>
<thead>
<tr>
<th>Week</th>
<th>Topic</th>
<th>Reading</th>
<th>Laboratory</th>
</tr>
</thead>
<tbody>
<tr>
<td>1-2</td>
<td>Introduction to GIS</td>
<td>Chapters 1 &amp; 15</td>
<td>Internet Mapping</td>
</tr>
<tr>
<td>3</td>
<td>Data Models</td>
<td>Chapter 2</td>
<td>GIS Data &amp; Metadata</td>
</tr>
<tr>
<td>4</td>
<td>Map Projections and Coordinate Systems</td>
<td>Chapter 3</td>
<td>Projections &amp; Transformations</td>
</tr>
<tr>
<td>5</td>
<td>Maps, Data Entry, Editing and Output</td>
<td>Chapter 4</td>
<td>Digitizing</td>
</tr>
<tr>
<td>6</td>
<td>GPS</td>
<td>Chapter 5</td>
<td>GPS</td>
</tr>

<tr>
<td>9</td>
<td>Attribute Data and Tables</td>
<td>Chapter 8</td>
<td>Data creation and editing</td>
</tr>
<tr>
<td>10</td>
<td>Basic Spatial Analysis</td>
<td>Chapter 9</td>
<td>Spatial Analysis</td>
</tr>
<tr>
<td>11</td>
<td>Basic Spatial Analysis</td>
<td>Chapter 9</td>
<td>Spatial Analysis</td>
</tr>
<tr>
<td></td>
<td><strong>Exam 2 - Covers Week 6-10</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td>12</td>
<td>Terrain Analysis</td>
<td>Chapter 11</td>
<td>3D Terrains</td>
</tr>
<tr>
<td>13</td>
<td>Spatial Estimation</td>
<td>Chapter 12</td>
<td>Surface Interpolation</td>
</tr>
<tr>
<td>14</td>
<td>Spatial Modeling</td>
<td>Chapter 13</td>
<td>Suitable Site Determination</td>
</tr>
<tr>
<td>15</td>
<td>Data Standards, Data Quality, and Selected Topics</td>
<td>Chapter 14</td>
<td>TBA</td>
</tr>
<tr>
<td>Final Exam</td>
<td><strong>Exam 3 - Covers Entire Course</strong></td>
<td></td>
<td>Course Portfolio Due at Final Exam</td>
</tr>
</tbody>
</table>

Note: This course outline is a general plan for the course; deviations announced to the class by the Instructor may be necessary. The assignments that are given are related to Student Learning Outcomes stated above.
ADDITIONAL POLICIES AND INFORMATION:

**Technological Excuses:**
Hard drive crashes and other computer woes will not be accepted as excuses for late submission. Students should, given the complexity of the tasks they will pursue, be sure that they maintain adequate backup copies of all aspects of their work. Additionally, plan ahead so that you will have time to use the on-campus computers and printers if necessary. You may NOT submit papers/assignments by e-mail. If for some reason you feel you have to do this, you must ask for, and receive, permission ahead of time; furthermore, you may not consider an e-mailed paper/assignment to be submitted until you have received a reply confirming that I have received the paper/assignment.

**Disabilities Accommodations:**
The Americans with Disabilities Act (ADA) is a federal anti-discrimination statute that provides comprehensive civil rights protection for persons with disabilities. Among other things, this legislation requires that all students with disabilities be guaranteed a learning environment that provides for reasonable accommodation of their disabilities. If you believe you have a disability requiring an accommodation, please call or visit Disability Services at (361) 825-5816 in Driftwood 101.

If you are a returning veteran and are experiencing cognitive and/or physical access issues in the classroom or on campus, please contact the Disability Services office for assistance at (361) 825-5816.

**Academic Advising:**
The College of Science and Technology requires that students meet with an Academic Advisor as soon as they are ready to declare a major. The Academic Advisor will set up a degree plan, which must be signed by the student, a faculty mentor, and the department chair. The College's Academic Advising Center is located in Center for Instruction 350, and can be reached at (361) 825-6094.

**Academic Honesty:**
Cheating and plagiarism will automatically earn zero (0) points for the assignment or exam. All academic work must meet the standards contained in the 2010-2011 Graduate Catalog, pages 25-26, sections titled "Academic Integrity" and "Academic Honesty" available at http://catalog.tamucc.edu and/or Undergraduate Catalog, pages 44-45, sections titled "Academic Integrity" and "Academic Honesty" available at http://catalog.tamucc.edu

Each student is responsible to inform themselves about those standards before performing academic work.
Grade Appeal Process:
As stated in University Rule 13.02.99.C2, Student Grade Appeals, a student who believes that he or she has not been held to appropriate academic standards as outlined in the class syllabus, equitable evaluation procedures, or appropriate grading, may appeal the final grade given in the course. The burden of proof is upon the student to demonstrate the appropriateness of the appeal. A student with a complaint about a grade is encouraged to first discuss the matter with the instructor. For complete details, including the responsibilities of the parties involved in the process and the number of days allowed for completing the steps in the process, see University Rule 13.02.99.C2, Student Grade Appeals, and University Procedure 13.02.99.C2.01, Student Grade Appeal Procedures. These documents are accessible through the University Rules Web site at http://www.tamucc.edu/provost/university_rules/index.html. For assistance and/or guidance in the grade appeal process, students may contact the Office of Student Affairs.
GENERAL GUIDELINES FOR COURSES AND LABS
IN THE GISC PROGRAM
CULTURE, REGULATIONS, MODES OF OPERATION AND PROCEDURES

These guidelines are designed to inform scholars of their responsibilities and of the course requirements in order to make this course a positive experience. The instructor is always available for consultation and discussion with students on any aspect of a course and of these general guidelines.

CLASS CULTURE

1. Consider yourself as a scholar rather than a student. The term “student” may imply some passivity, whereas the term “scholar” implies active participation, understanding and searching. We will use these terms interchangeably with the meaning of “scholar” implied. Osmosis does not work in a learning environment!

   A good scholar takes NOTES at every class meeting.

2. Further, define yourself as a “thinking explorer”. You are responsible for your education; an instructor can only be a guide and a facilitator. An instructor cannot learn for you. If you come across something that really interests you, explore it further.

3. Your experience at this University should not consist of passing a series of courses to earn a degree. Your experience should rather be a series of activities that will give you an education.

4. Concentrate on “learning to learn”. You will have to be a life-long learner to survive in your chosen career.

5. There is no such thing as a stupid question; there is such a thing as a stupid answer. So ask questions, the instructor is taking all the risks! Ask questions of your instructor and of your fellow scholars. Many times questions are more important than answers.

6. Keep copious notes of all that is going on in all the meetings related to your course. Make a note of what the instructor is stressing. At the end of each lecture you should be able to answer two questions: What did I learn from this lecture? and What was not clear to me? At the beginning of each lecture, if the instructor does not ask for questions, you need to ask if there is something you did not understand from the last lecture. Review, consolidate, annotate and organize your lecture/lab notes on a regular basis, at least once a week. The Internet is a tremendous resource and also a great danger. When you find information on the Internet, you have no idea if it is correct. View such information with caution. But, use the Internet to explore topics that interest you. Do not only prepare for the exam in a course – learn as much as you can on the topics introduced to you by the course material. You are responsible for the extent of your education! READ MINDFULLY !!!!!

7. In addition to details of the syllabus given in class, the syllabus for the course includes all the chapters of the required textbook/s unless indicated otherwise by the instructor. The student is responsible for all materials/topics covered in class, in handouts, in assignments, in labs, and in outings or field trips. The instructor is NOT responsible for informing absent students exactly what was covered in previous classes, meetings, etc.
PROCEDURES & REGULATIONS

8. The final letter grade for the class will be based on the raw composite numerical score obtained from the weighted average of the tests, quizzes, exams, labs, etc. as indicated by the instructor. The raw composite numerical score may be adjusted (curved) based on the highest score, the statistical profile of the scores and other academic standards or other considerations. Generally the letter grade of A is 90% and over of the adjusted score, a B is between 80% and 89% (inclusive) of the adjusted score, a C is between 70% and 79% (inclusive) of the adjusted score, a D is below 70% of the adjusted score and an F is below 65% of the adjusted score. An incomplete (I) will only be given in very unusual circumstances. The University regulations on incomplete grades state: “An incomplete notation may be given to a student who is passing but has not completed a term paper, examination, or other required work for reasons beyond the student’s control other than the lack of time”. Students are expected to take ALL tests, quizzes, exams, etc., and to complete and hand in all labs and other assignments. There is no provision for “extra credit”. No final grades will be given via the telephone, e-mail, etc.

9. All University rules, regulations and expected student conduct apply to this course. Students are held responsible for the information given in the current Catalog and Student Handbook. Make yourself aware of the University security regulations.

10. All labs, assignments, etc. must be handed in on the assigned due date. Scholars having problems must notify the instructor well before the due date. Marks will be deducted for poor and sloppily presented work.

11. Labs, etc. handed in after the due date may be subject to a penalty of loss of marks. Labs, etc. handed in after the graded labs, etc. have been returned to students will get zero marks but must be handed in to the instructor. Labs will be returned to students, after they have been graded, at a class meeting. Students who miss this meeting will be able to collect graded work during the instructor’s office hours or next class meeting.

12. Scholars are asked to take special note of the penalties, which the University attaches to Academic Dishonesty. Consult the Student Handbook.

13. All work handed in to the instructor must be the student's own work. Extracts, excerpts, etc. from the work of others must be suitably noted, acknowledged and properly referenced. Any Group Work will be judged in the same way. That is, it is the work of the group and the extracts, excerpts, etc. of others must be acknowledged.

14. All written and graphical work handed in must be presented neatly printed and bound (staples are adequate). Students’ written work will be judged on written communication skills, critical thinking and problem solving ability.

15. Students are expected to be present at all meetings (lectures, labs, etc.) of the class. Students are expected to be present at the date and time assigned for all tests, exams, quizzes, etc. There are NO provisions for making up missed exams except in cases where prior arrangements have been made and agreed to by the instructor. During the assigned lab session, ONLY assigned labs are to be done. All other work must be done in other rooms.

16. All cellular phones and other similar devices MUST BE TURNED OFF during lectures, labs and other class meetings.

17. All students must keep their university e-mail addresses (firstname.lastname@islander.tamucc.edu). This will be the means of communication between the instructor and the class.

18. The instructor reserves the right to make changes to the above with due notice to the students. These changes will be announced in class and each student is responsible for keeping herself/himself informed of such changes.
