I. COURSE INFORMATION

Meeting Time & Place
Lectures TR 8:00-9:15 am CS 114
Lab T 9:30-11:20 am

Professor
Dr. Jose H. Giraldo

Office Phone
825-5827

Office
CI-317

e-mail
jose.giraldo@tamucc.edu

Web Page
https://sci.tamucc.edu/calculusII/

Office Hours
TBD
Others by appointment

II. COURSE DESCRIPTION
Integration, applications of integration, especially to differential equations, sequences, series, Taylor polynomials, Taylor series and power series. Contains a one-hour lab component.

III. PREREQUISITES FOR THE COURSE
MATH 2413 (Calculus I), or instructor’s Consent.

IV. TEXT and OTHER SUPPLIES REQUIRED
The required textbook for the course is Calculus, Early Transcendentals, 7th edition by Stewart.

Technology: A graphing calculator is required for this class. The mathematics department supports the TI-83 plus, but in general you can use any graphing calculator. I will support either TI-83 plus or TI-89.

V. STUDENT LEARNING OUTCOMES
At the end of the course the student should be able to:
1. Evaluate integrals by
   - the Fundamental Theorem of calculus
   - substitution
   - integration by parts
   - trigonometric substitution
   - by using trigonometric identities to simplify an integrand
2. Use integrals to determine volumes
   - by using washers (slicing)
   - by using cylindrical shells
3. Use integrals to determine surface areas or curve lengths
4. Determine whether an integral is an improper integral and determine whether an improper integral converges
5. Determine convergence/divergence of a sequence

6. Determine convergence/divergence of an infinite series
   - by the integral test
   - by a comparison test
   - by the root or ratio test

7. Determine the radius and interval of convergence of a power series

8. Find the Taylor or Maclaurin series for elementary functions

9. Convert between Cartesian and polar coordinates and graph in polar coordinates.

VI. INSTRUCTIONAL METHODS AND ACTIVITIES

The concepts in the course will be learned emphasizing a numerical, graphical, algebraic and verbal approach. It is expected that you come to class prepared to discuss the assignments. In class the instructor will present key concepts and/or examples. After this the students will work in groups doing activities or solving problems related to the class presentation. Group work is an essential component of this class and a key part for you to understand the concepts and to your success. Throughout the course the student will be an active participant in the learning process. I expect you to be a scholar, not a spectator.

Keep in mind that you CAN ONLY REMEMBER

<table>
<thead>
<tr>
<th>Percentage</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>10%</td>
<td>of what you read</td>
</tr>
<tr>
<td>20%</td>
<td>of what you hear</td>
</tr>
<tr>
<td>30%</td>
<td>of what you see</td>
</tr>
<tr>
<td>50%</td>
<td>of what you see and hear</td>
</tr>
<tr>
<td>70%</td>
<td>of what you discuss with others</td>
</tr>
<tr>
<td>90%</td>
<td>of what you teach someone else</td>
</tr>
</tbody>
</table>

I strongly recommend forming groups of three or four people. I will not assign any grades to the group as a whole, but my experience indicates that students who work in groups tend to be more successful. From participating actively in the activities/problems assigned, you will reach the level that enables you to discuss the concepts, or teach them to someone else. Some of the lab work may be collected as a group work or as individual work.

The only way to learn mathematics is with an active individual work. This implies to be prepared for each class and do as many problems as needed to reach the level desired.

Don’t forget that making mistakes and correcting them is a wonderful learning tool.

VII. EVALUATION AND GRADE ASSIGNMENT

All the work done in the class will be part of your final grade. The table below shows the weight of each of the items considered to determine your grade.

During the first two weeks of the semester you will be reviewing on your own and under the instructor guidance basic concepts needed for this course: basic algebra skills, computation of limits, computations of derivatives. I expect a proficiency of at least 90% on these items.
Two exams 40%
Quizzes 10%
Labs 10%
Gateway Test (integration) 10%
WebWork Homework 10%
Final Exam (Comprehensive) 20%

Quizzes
There will be about ten quizzes during the whole semester. The in class quizzes will be taken during the lab period (at the beginning). Some quizzes will be take-home ones.

THERE ARE NO MAKE-UPS FOR THE QUizzes BUT YOU CAN RETEST.

Gateway Test
The approach for this course emphasizes comprehension of the mathematical concepts as well as the computational part of them. To guarantee that you have the minimum computational skills needed to succeed in other classes requiring them, you are required to take the gateway test on INTEGRALS, which is exclusively computational. The test will show your proficiency on the topic. You can take this test up to three times to achieve the minimum proficiency required which is 80%. No partial credit is given. This test is a closed book, closed notes and no calculators. The dates to take it will be announced in the class calendar.

Midterms
There will be two midterms. For each midterm exam (not for the gateway test) you are allowed to use your calculator, and a sheet of paper (notebook size) with any information you want to. That sheet of paper will be attached to your test when you turn it in. The dates for the midterms are indicated in the calendar. I will post a review for the midterms as well as sample tests I have given in the past.

Final Exam
The final exam will assess the students’ learning outcomes set for this course. Any information about the final exam will be posted on WebCT.

I RECOMMEND TO KEEP YOUR HOMEWORK, WRITTEN/LAB ASSIGNMENTS, QUIZZES AND TESTS.

Grading Scale: Grades will be based on the following percentages:
A = 90.00 - 100%,  B = 80.00 - 89.99%,  C = 70.00 - 79.99%,  D = 60.00 - 69.99%,  F = below 60%

VIII. POLICIES AND OTHER INFORMATION

o Use the resources you have available: your classmates, the STEP mentors, the Teaching Assistant, the professor, the Center for Academic Student Achievement (CASA). All of this will lead to our main objective, which is YOUR LEARNING.

o The course requires a solid and continuous effort. Since this is a four-credit course, you are expected to devote for each hour of class between two and three hours outside the class working on the subject. Some people need more time than others. Each individual has a different way to learn. All of us are different.

o I do expect that you come to each class prepare to talk about any assigned work and readings. One of the best ways to learn any subject and specially mathematics
is by talking to others about a problem after you have read and attempted the problems on you own. Listening to a solution without attempting to solve it and struggling through the process will not benefit you very much. Be aware that reading the solutions and be able to follow the explanation does not mean that you know how to do the problem and understand all what is involved in it.

- At the beginning of each class you have the opportunity to ask questions about the homework. Use that time wisely. Remember that making a serious attempt to solve a problem and later discuss your solution or to clarify doubts is key in the learning process.

- Feel absolutely free to ask any questions. Your question will benefit you and most likely others around you. One of the driving forces of mathematics is the questioning part. Why? Why? Why? Rote memorization is not a great help here but is needed too at some point.

- Do not hesitate to contact me in case you want to discuss your performance in the class. I am here to lead your learning but you are the one responsible for it. I AM THE COACH AND YOU ARE THE PLAYER.

- After you receive your grades you have up to the next class meeting to dispute it. I am the only person you can dispute your grade with. After the two days I assume that you accepted your grade. NO EXCEPTIONS. Grades are posted on the web immediately after I return a graded paper.

- You are expected to be on time for class. Arriving late or leaving the classroom before the end of the period will be considered impolite, and rude to your classmates and professor. BE ON TIME FOR EACH MEETING. Your attendance will be monitored. The attendance sheet will be in the front of the classroom for each meeting. Make sure you check it on daily basis.

- If at any point in the semester you are considering to drop the class, talk to me before you do it. I am here to help you in your learning experience and to help you to succeed in your college career.

- Do not be late in the work you have to turn in. For any work to be collected this is the policy on tardiness: For your late work to be accepted you need to present an excuse to the professor. If the professor accepts to take the work, it will be graded over 80% of the initial grade. Work ahead of schedule. Do not wait for last minute surprises.

The most basic rule to work as part of a group is to respect others. I will appreciate all your effort to make it the golden rule. Refer to others with respect.

## X. DROPPING A CLASS

I hope that you never find it necessary to drop this or any other class. However, events can sometimes occur that make dropping a course necessary or wise. Please consult with me before you decide to drop to be sure it is the best thing to do. Should dropping the course be the best course of action, you must initiate the process to drop the course by going to the Student Services Center and filling out a course drop form. Just stopping attendance and participation WILL NOT automatically result in your being dropped from the class. Look at the calendar to find the last day to drop a class with an automatic grade of “W” this term. You are allowed to have only 6 W’s during your whole program. It means, drop the class if this is in your best interest.

## XI. ACADEMIC HONESTY

**Academic Honesty:** university students are expected to conduct themselves in accordance with the highest standards of academic honesty. Academic misconduct for which a student is subject to penalty includes all forms of cheating, such as illicit possession of examinations or examination materials, forgery or plagiarism.

## XII. DISABILITY SERVICES
The Americans with Disabilities Act (ADA) is a federal anti-discrimination statute that provides comprehensive civil rights protection for persons with disabilities. Among other things, this legislation requires that all students with disabilities be guaranteed a learning environment that provides reasonable accommodation of their disabilities. If you believe you have a disability requiring an accommodation, please contact the Disability Services Office at (361) 825-5816 or go to the office at Driftwood 101.

XIII. GRADE APPEALS PROCESS

As stated in University Rule 13.02.99.C2, Student Grade Appeals, a student who believes that he or she has not been held to appropriate academic standards as outlined in the class syllabus, equitable evaluation procedures, or appropriate grading, may appeal the final grade given in the course. The burden of proof is upon the student to demonstrate the appropriateness of the appeal. A student with a complaint about a grade is encouraged to first discuss the matter with the instructor. For complete details, including the responsibilities of the parties involved in the process and the number of days allowed for completing the steps in the process, see University Rule 13.02.99.C2, Student Grade Appeals, and University Procedure 13.02.99.C2.01, Student Grade Appeal Procedures. These documents are accessible through the University Rules Web site at http://www.tamucc.edu/provost/university_rules/index.html. For assistance and/or guidance in the grade appeal process, students may contact the Office of Student Affairs.

LIABILITY STATEMENT. A student is responsible and has to abide by any information given in class and through the web page of the course. It may include changes on dates for tests, format of the test, and so on. Hence, if you miss class, make sure you get the information from somebody else or from the web page.

*Notice to Students with Disabilities. Texas A&M University-Corpus Christi complies with the Americans with Disabilities Act in making reasonable accommodations for qualified students with disabilities. If you suspect that you may have a disability (physical impairment, learning disability, psychiatric disability, etc.), please contact the Services for Students with Disabilities Office, located in Driftwood 101, at 825-5816. If you need disability accommodations in this class, please see me as soon as possible.

**ACADEMIC ADVISING
The College of Science and Technology requires that students meet with an Academic Advisor as soon as they are ready to declare a major. The Academic Advisor will set up a degree plan, which must be signed by the student, a faculty mentor, and the department chair. The College's Academic Advising Center is located in Faculty Center 178, and can be reached at 825-6094.

MISSING FINAL EXAM. Any student missing the final exam for any reason will get a score of zero. If you have a reason to miss the final exam, you need to apply for an Incomplete Grade (I). If the application for an incomplete grade is approved you can then
take the final exam the next semester to complete your work. In those cases a grade of I will be temporarily assigned.

IX. CLASS POLICIES

○ Use the resources you have available such as your professor, the Teaching Assistant, the Tutoring and Learning Center, your class mates. All of this will lead to our main objective which is YOUR LEARNING.

○ The course requires a solid and continuous effort. Since this is a four-credit course, you are expected to devote for each hour of class between two and three hours outside the class working on the subject (some people need more time than others)

○ I do expect that you come to each class prepared to talk about any assigned work and readings. One of the best ways to learn any subject and specially mathematics is by talking to other people about it after you have tried the problems. Listening to a solution without trying and struggling through it will not benefit you very much. **Be aware that reading the solutions and be able to follow the explanation does not mean that you know how to do the problem and understand all what is involved in it.**

○ At the beginning of each class you have the opportunity to ask questions about the homework. *Use that time wisely.* Remember that making a serious attempt to solve a problem and later discuss your solution or to clarify doubts is extremely beneficial in your learning process.

○ Feel absolutely free to ask any questions. Your question will benefit you and most likely others around you. One of the driving forces of mathematics is the questioning part. Why? Why? Why? Rote memorization is not a great help here.

○ Do not hesitate to contact me in case you want to discuss your performance in the class. I am here to lead your learning but you are the one responsible for it. I AM YOUR COACH, YOU ARE THE PLAYER.

○ After you receive your grades you have up to the next class meeting to dispute it. I am the only person you can dispute your grade with. After the two days I assume that you accepted your grade. NO EXCEPTIONS. Grades are posted on the web after I return a graded paper.

○ You are expected to be on time for class. Arriving late or leaving the classroom before the end of the period will be considered impolite, and rude to your classmates and professor. **BE ON TIME FOR EACH MEETING.** Your attendance will be monitored. The attendance sheet will be in the front of the classroom for each meeting. Make sure you check it on daily basis.

○ If at any point in the semester you are considering to drop the class, talk to me before you do it. I am here to help you in your learning experience and to help you to succeed in your college career.

○ Attendance is mandatory. If you miss more than one week of classes (2 absences) your final grade will be reduce by one full grade. NO EXCEPTIONS.

○ Do not be late in the work you have to turn in. For any work to be collected this is the policy on tardiness: For your late work to be accepted you need to present an excuse to the professor. If the professor accepts to take the work, it will be graded over 80% of the initial grade. Work ahead of schedule. Do not wait for last minute surprises.

> **THERE ARE NOT EXCEPTIONS TO THE POLICY.**

The Mathematics department complies with the Americans with Disabilities Act in making reasonable accommodations for qualified students with disabilities. If you need disability accommodations in this class, please see me as soon as possible. Please have your accommodation letter from TAMU-CC Services for Students with Disabilities Office with you when you come to see me. If you suspect that you may have a disability (physical impairment, learning disability, psychiatric disability, etc.), please contact the Services for Students with Disabilities Office (located in Driftwood 101) at 825-5816. It is important that you contact them in a timely fashion as it may take several days to review requests and prepare accommodations.

**Academic Integrity:** You are assumed to be familiar with, and to abide by, all TAMUCC policies and procedures, particularly the **Code of Academic Integrity** and the **Student Code of Conduct.** Students found to be in violation of any of these policies will be appropriately sanctioned.
