Semester Information Spring 2015

Class Hours and Times
ARTS-2346.002 Katz Beginning Ceramics TR 12:30-03:20 PM
Office Hours - Katz
TR 3:20 - 4:35 MW 2-3:15

Stable Information and Teacher Information:

- Name of Instructor: Louis Katz
- Office phone number: 361 825-5987 (Louis' Office)
- E-mail address: Louis.Katz@tamucc.edu
- Office number and building: CA112
- This syllabus is subject to change.

- Students will be expected to have a notebook every day in class with a
  implement. The notebook will hold all class handouts and the students notes.
  Students arriving without a notebook may be recorded as absent. We will not
  wait as students go to get notebooks or pencils that are outside the classroom.
  Taking careful notes during demonstrations and using them will greatly
  improve a student's success.
- completion of all projects assigned. See grading sheet.
- participation in preparation of clay and glazes for class use; students will be
  assigned or allowed to choose a mixing partner and will mix clay or glazes as
  necessary several times each semester. Do not waste work, avoid putting usable
  clay in scrap barrels.
- participation in loading and unloading of class kilns
- having a pair of rubber gloves available for gloves and safety glasses for glazing.
- Tests: students that fail a test on the safety materials (if it is given) must
  demonstrate knowledge of all the items on the safety agreement before returning
  to class.
- all project work and outside work to be graded must be available for review at
  the end of the semester. Due to space limitations fired finished work may not be
  stored in the ceramics studios. If work will not fit in lockers, students must make
  other arrangements for safe storage- i.e., take work home, etc. Again, all work
  must be available for review at semester's end. If work must be sent somewhere
  else discuss what to do with your instructor first.
- Studio Safety and Hygiene: we will read, sign, and hand in the student
  agreement, attached. All students are required to clean up their work areas before
  leaving the studio and do other studio cleaning as necessary.
- all work, tools and other belongings, must be removed from the studio the last day
  of finals week by noon. (in the summer session by the end of the day of finals).
  The studio will be cleaned and remaining personal belongings and clay-work may
  be thrown out.
• **BREAKAGE, LOSS, FIRING ACCIDENTS** Ceramics is fragile, firing is difficult and full of unknowns, especially in a group situation. It is inevitable that some pieces will be lost, broken, or misfired. While losses are regrettable they will happen. The faculty and TAMU-CC cannot be held liable for such accidents. Students should handle work carefully and as little as possible. All work must be marked with a student's initials or stamp.

• **LOCKERS:** See the Art Office (CA107) to reserve a locker in the hallway. You will need one. The sooner you get one the closer it will be to the studio. If you wait there might not be one available.

• **STUDIO HOURS:**
  - You may use the Ceramics Lab any time when the building is open except during class time for the other sections of Ceramics or during floor cleaning.
  - The class will involve work in the studio outside of class time.
  - The building is open many nights and weekends. Check on the front door, or with the building supervisor for details. It may be closed Thanksgiving weekend and Labor Day weekend and MLK day.

• **CALENDAR:** Ceramics is a time sensitive medium. Allowing projects to dry slow and even makes work less prone to cracking and easier to manipulate. Consequently work completed late in the semester will have a greater chance of cracking in the drying process. It is often possible to finish a piece in a small fraction of the time it would take to do it in one week if you spread the work out.

  Approximately two weeks before final exams will be the end of the time when wet clay can be used. (this date is different in the summer). This date is not fixed until a month before the end of the semester. If most of the work in the studio is already bisqued (the first firing of the two needed) a few more days of wet work can be added. If little has been bisqued a few more days for firing will be needed and there will be less time for wet work. Even with this two week lead, objects made the last few days for wet work will need to be small if they are to survive the fast drying necessary. Roughly one week before finals will be the last time pots can be glazed. This will occur during dead day. The exact date for the last day for wet work is determined by the amount of work in the studio still needing to fired at the end of the semester.

  Occasionally there is too much work to fire in the last week. If the work was glazed before the last day to glaze and it was on the racks to be fired before the last day for them to be placed there it will be graded as if it was glaze fired. Work still needing firing may be brought back into ceramics at the beginning of the next long semester for firing. It may not be left in the studio between semesters. Work left in the studio between semesters will be thrown away.

---

Required statements:

* **ACADEMIC ADVISING**
  The College of Liberal Arts requires that students meet with an Academic Advisor as
soon as they are ready to declare a major. Degree plans are prepared in the CLA Academic Advising Center. The University uses an online Degree Audit system. Any amendment must be approved by the Department Chair and the Office of the Dean. All courses and requirements specified in the final degree plan audit must be completed before a degree will be granted. The CLA Academic Advising Office is located in Driftwood #203. For more information please call 361-825-3466.

DISABILITY SERVICES
The Americans with Disabilities Act (ADA) is a federal anti-discrimination statute that provides comprehensive civil rights protection for persons with disabilities. Among other things, this legislation requires that all students with disabilities be guaranteed a learning environment that provides for reasonable accommodation of their disabilities. If you believe you have a disability requiring an accommodation, please call or visit Disability Services at (361) 825-5816 in Corpus Christi Hall, Room #116. If you are a returning veteran and are experiencing cognitive and/or physical access issues in the classroom or on campus, please contact the Disability Services office for assistance at (361) 825-5816.

GRADE APPEALS PROCESS
Students who feel that they have not been held to appropriate academic standards as outlined in this class syllabus, equitable evaluation procedures, or appropriate grading, may appeal the final grade given in the course. A student with a complaint about a grade is encouraged to first discuss the matter with the instructor. For complete details on the process of submitting a formal grade appeal, please visit the College of Liberal Arts website, Error! Hyperlink reference not valid.. For assistance and/or guidance in the grade appeal process, students may contact the Associate Dean’s Office.

- Course Specific Information
- Course title: Ceramics I
- Course number: ART 2346
- Course description: This course is an introduction to fine arts ceramics. Handbuilding processes: pinching, slab construction, coil building, etc., will predominate. There will be approximately six major projects, some of which may require the student to make more than one object. An introductory wheel thrown project will be assigned. Various clays and slips will be used. Most work will be fired in high-fire reduction or high fire soda kilns. bonfire, pit, and Raku firing processes may also be included. Each student will mix clay at least once and probably twice during the semester. Students will learn to unload and load bisque and glaze kilns, & maintain kiln shelves. Students will learn how to apply even coats of glaze in appropriate thicknesses. Significant out class time will be required. Students are required to be familiar with material on the safety
agreement and may be tested on it at any time. A test on the syllabus and the handout "The Material" may be given during third class period.

- **Student Learning Outcomes:**
  1. Student will use a variety of clay, slips, glazes and experience simple firing techniques.
  2. Student will become competent in basic handbuilding and glazing techniques.
  3. Student will begin to learn about using the potter's wheel.
  4. Student will successfully work with form, proportion and surface in three-dimensional ceramic objects.
  5. Student will become aware of the scope historical and contemporary ceramic art.
  6. Student will begin to learn about loading and firing kilns.
  7. Student will gain the sensitivity to be able to gauge the appropriate wetness of the material for a particular process.
  8. Student will begin to gain a broader understanding of the scope of the medium and an introduction into philosophical issues surrounding the field.

**Graded activity:**

Beginning students will make a bisque stamp to identify their work. All assignments should have your initials incised into the clay or have your stamp. The relief on the stamp should be high and have clean sides so it pulls away easily.

- Pinched Vessels and sculpture
- Slab container Plates and slip
- Coil Assignment
- Slab Assignment
- Slab Teapot
- Thrown Cylinders
- Handled Cups
- If time permits, an assignment where students get to choose to do one the previous clay assignment over and expand on the assignment.

**Typical Assignment Descriptions**

- Pinched Vessels, 10 vessels, 5 to be graded. Vessels for use to test and see how class glazes look.
- Slab Plates and slip, 10 plates, 5 to be graded. Plates with slips, incised lines, or scrafito.
- Coil Assignment, create a pot that between 16-20 inches in height. Student should look to create a vertically oriented pot.
- Slab Assignment, use slabs over molds to create bowl/platter with foot, and a slab vase that is at least 12 inches in height.
- Slab Teapot, create a slab teapot that can pour liquid.
- Thrown Cylinders, 20 prints of cylinders that are taller than they are wide, and keep the best cylinder
- Handled Cups, 10 handled cups, 5 to be graded.
- If time permits, an assignment where students get to choose to do one the previous clay assignment over and expand on the assignment.

GRADE BEFORE AT TENDANCE ______________

GRADE AFTER ATTENDANCE ________________

Grade lowered one letter for missed final.

For a grade of A student must:

- Complete all studio practices.
- Finish all objects satisfactorily. At least three must be excellent.
- Demonstrate all skills satisfactorily. At least three skills must be excellent.

For a grade of B Student must:

- Complete all studio practices.
- Finish all objects satisfactorily
- Demonstrate each skill except integration satisfactorily.

Excellence in any one part of a group offsets an unsatisfactory in that group

Grade of C

- Complete 2 of three studio practices
- Finish all but two objects satisfactorily. Student must complete all but one of the objects.
- Demonstrate all but two skills satisfactorily. One of these must be the ability to construct and finish. Most work must be glazed.

- Projects that are finished by the end of the semester but do not meet wet finished or glaze deadlines will be marked unsatisfactory
- All student grades after computing by this method will be adjusted per the attendance policy.
- All work must be available for review during the final exam period.
Policies

- late work:
  - Any work not available for the final exam period will not be graded unless a missing work agreement is brought to the final exam.
  - Work not available for the assignment critiques may be marked as not on time.

- Plagiarism: Work made by other students will be marked as not turned in, skills associated with the work will be marked as unsatisfactory. Students caught turning in the work of other students may be subject to the rules and procedures set out in the student handbook.

-ATTENDANCE: -

  - This is a studio class. Attendance is mandatory. There is no "make up work" to compensate for missed class time. Some information will be imparted only during class. It is the student's responsibility to follow the attendance procedure.
  - Students missing more than 3 classes will be marked down one full grade. Each two classes absence after that will result in the loss of another grade. Three tardies equals one absence.
  - All assignments spanning more than two class periods must be reviewed in progress during class time. It is not acceptable to complete all work on a project outside of class. It may not be possible to complete all work for a project inside class. Passing through the building to cover and uncover work will be necessary several times a week. If the plan is to be on campus only twice a week, a different class might be a good idea.
  - LATENESS- It is essential that students come to class ON TIME. Important information will be given each class during the first few minutes of class. Attendance may be taken by sign in sheets or other means.
  - Leaving early- While it is better to show up for part of a class than none at all. Leaving early without the instructors' permission (he may say no) may result in an absence or lateness being recorded for the day. Often demonstrations, or slide shows occur in the last 1/2 hour of class.
  - It is the students responsibility to find out what materials were missed because of absence or tardiness. Just as in lecture classes the absent students will want to ask fellow students for notes. It is not the instructors responsibility to provide makeup demonstrations.
  - Students missing the final exam will be marked down a full letter grade. The instructor must still be shown the student work before he turns in
grades or lack of information may result in an F. Conflicts with the exam
time must be worked out the first week of school.
- Incompletes will be given to those called to active US military duty in
accordance with university policy. Other incompletes are at the instructor's
discretion. They will not be given unless 3/4 of the work is finished before
the reason for the incomplete takes place. The reason must be out of the
students control. Attendance must be good before the reason for the
incomplete takes place.

Supplies Texts/readings:

- rubber gloves for glazing, safety glasses for glazing
- Safety Glasses for glazing.
- Kemper potter's tool kit
- a dull Xacto® knife, or a dull drywall knife, or a dull pairing knife, Best is a
potters long bladed fettling knife. A long thin straight blade is best, sometimes
these can be picked up cheap at discount stores such as the Dollar Store® or thrift
stores.
- Serrated rib.
- thin plastic drop cloths (.3-.8 mm) for covering work. Paint and hardware,
  lumber stores sell these for about $1.00
- notebook. You should have your notebook in class at all times and use it to
  record processes, hints, etc. during demonstrations. All handouts should be stored
  in your notebook. They are almost all available online at
  http://www.tamucc.edu/~lkatz if you loose one.
- work clothes: You might want to keep a change of clothes that you can get very
  dirty in your locker, also closed top, and closed back shoes that you can work in.
  You cannot be in the studio with sandals, open or high heeled shoes. Loose skirts
  and aprons, hanging jewelry and other loose ware are not safe for mixing clay.
  See student agreement.
- hair control devices: long hair must be tied back when using potter's wheel,
  mixing clay, using the grinder, or firing kilns.
- one gallon or so plastic bucket with a wide top.
- Cap: to cover your hair when mixing clay or glaze, sweeping, or other dusty jobs
  (optional).

SUGGESTED TEXT

- Ceramics A Potter's Handbook by Glenn C. Nelson, Richard Burkett any
  edition. It is quick reading and may be able to be checked out of local
libraries. My general advice to students is to read the handbuilding sections first, then about clay, history and save the glazing section to midterm. Students that read the book do better.

Other SUGGESTED TEXTS

- HANDS IN CLAY - Charlotte Speight, Has the most information about contemporary and historical ceramics, along with technical and technique oriented information. I have considered changing to this text. It is very good. I am not impressed by their safety information
- Ceramics Monthly Magazine. Anyone serious about clay should be subscribed to this magazine. Others should look at it in the library. Other magazines in the library worth looking at are American Ceramics, Studio Potter, and Ceramics Technical.

Provisional Calendar

Day 1 Syllabus and Safety

Deadlines for assignment critiques are given with the assignments, but final grading on assignments is not done until the final exam

Daily demos, lectures or critiques as humidity and firing dictate

Two weeks before Reading day is the provisional last day for wet clay work.

One week before Reading day is the provisional last day for glazing.

The last day of finals is the last day to remove work from the studio before it is subject to being thrown out.
