Neurobiology BIMS 4323
Department of Life Sciences
Spring 2015

A. COURSE INFORMATION

Course number/section: 4323.001
Class meeting time: MW 7:00 – 8:15 pm
Class location: BH 104
Course Website: https://bb9.tamucc.edu/

B. INSTRUCTOR INFORMATION

Instructor: Riccardo Mozzachiodi, Ph.D.
Office location: EN 321
Office hours: MT: 12:00 – 2:00 pm; W: 12:00 – 1:00 pm; other times by appointment
Telephone: 361-825-3634
e-mail: riccardo.mozzachiodi@tamucc.edu
Appointments: To request an appointment outside of office hours, send email to the above email address at least 48 hours in advance. In the email, please specify the reason of the appointment.

C. COURSE DESCRIPTION

Catalog Course Description
Studies the anatomy and physiology of the nervous system. Includes an examination of evolutionary trends in nervous system development, neural function, nerve impulse transmission, sensory and motor systems, behavior, emotional states, learning and memory. Particular emphasis is placed on human functioning.

Extended Course Description
This course focuses on the physiology and morphology neurons and their role in generating critical functions. Topics include: physiology of the neuron; genesis of resting and action potential; synaptic transmission; brain development and neuroanatomy; sensory and motor systems; neural basis of learning and memory; mental illness. This is a rigorous course containing a large amount of information that is covered rapidly. This elective course is beneficial for students interested in attending professional schools and graduate programs in biomedical sciences.

D. PREREQUISITES AND COREQUISITES

Prerequisites
BIOL 2416

Corequisites
None
E. REQUIRED TEXTBOOK(S), READINGS AND SUPPLIES

Optional Textbook(s) or Other References
The electronic versions of the lecture handouts (PDF format) as well as the syllabus and study guides will be made available on Blackboard. Handouts will be posted on Blackboard one week before class. When necessary, additional material will be posted on Blackboard.

F. STUDENT LEARNING OUTCOMES AND ASSESSMENT

Assessment is a process used by instructors to help improve learning. Assessment is essential for effective learning because it provides feedback to both students and instructors. A critical step in this process is making clear the course’s student learning outcomes that describe what students are expected to learn to be successful in the course. The student learning outcomes for this course are listed below. By collecting data and sharing it with students on how well they are accomplishing these learning outcomes students can more efficiently and effectively focus their learning efforts. This information can also help instructors identify challenging areas for students and adjust their teaching approach to facilitate learning. By the end of this course, students should be able to:

1) Describe the morphology and physiology of neurons
2) Describe how neurons generate and propagate electrical signals
3) Describe how information is communicated from one neuron to another
4) Describe the development and anatomy of the nervous system
5) Describe how neurons sense the external and internal environments
6) Describe how movements are generated
7) Describe complex functions, such as learning and memory

G. MAJOR COURSE REQUIREMENTS AND GRADING

The student learning outcomes outlined above will be assessed throughout the semester by using two types of in-class assignments: 1) Exams and 2) In-Class Learning Exercises. The comprehensive nature of exams and learning exercises (see details below) will allow the instructor and the student to assess knowledge on both current topics and previous material at several points during the semester.

1) Exams: There will be 5 exams (4 during the semester + final exam). Each exam, including the final, is worth 100 points. Each exam will focus on the material covered during lectures and is listed in bold in the tentative schedule (see below). All the exams are comprehensive. Consequently, exam 2, for example will cover material from chapters 6 - 9, but it may also contain questions about previous sections (chapters 1 - 5). In addition to the handouts, students are responsible for all material, such as videos, guest lectures, websites etc. covered during class. Exams may contain questions in the following formats: multiple choice, matching, true/false, making/labeling drawings, short answer questions, and essay questions. The lowest grade of the 5 exams will be automatically dropped. If the grade obtained at
the end of the regular semester (i.e., after 4 exams and 8 in-class learning exercises) cannot be improved with the final exam, the student does not have to take the final exam. Consequently, students will take the final exam to replace the lowest exam grade obtained during the semester and improve the cumulative grade. Exams are completed on a scantron answer sheet, which will be provided. Both exam and scantron answer sheet must be completed and submitted at the end of the test. Grades are calculated based on the answers provided on the scantron sheet. Consequently, if an answer was bubbled wrong on the scantron, but was marked correctly on the exam text, it will remain counted wrong. Additionally, answers that are not bubbled on the scantron will be counted wrong, even when marked correctly on the exam text. Therefore, students are strongly encouraged to carefully check their answers on the scantron before turning it in. An exam lasts as a regular class (approximately 60 minutes). There will be no lecture on exam days. During exams, students will be required to remove their caps, hats, etc. Different test forms may be prepared for an individual exam. Follow instructions. If a student leaves the examination room for any reason he/she must hand the test and will not be allowed to resume the examination. Students are encouraged to attend to personal matters (e.g., rest room visits) before the beginning of the exam. **Be on time! Anyone arriving after someone has already completed and turned in an exam and left the room will not be allowed to take that examination.**

2) **In-Class Learning Exercises**: At random dates during the semester, students will engage in in-class learning exercises. These exercises will require the students to answer questions about topics covered during class. These in-class learning exercises will not be announced in advance. During the in-class learning exercises, students will be allowed to use textbook and handouts with notes, but not electronic devices including portable computers and phones. There will be 8 in-class learning exercises, each worth 10 points. Each in-class learning exercise lasts 10 minutes and can be presented at any time during class (i.e., at the beginning, at the end or during class). In-class learning exercises will not be scheduled on a day when an exam is already scheduled. All the 8 in-class learning exercises will count for the final grade. During in-class-learning exercises, students will be required to remove their caps, hats, etc. Once the student has turned in an in-class learning exercise, he/she is not allowed to turn on the cell phone or the computer or leave the room **until all the students have turned in their assignments and the instructor begins/resumes the lecture.**

Partial grades for exams and in-class learning exercises will be posted on Blackboard. **It is the students’ responsibility to regularly check their scores on Blackboard.**

The final grade is based on the sum of 4 exams (400 points; 83% of the final grade) and 8 in-class learning exercises (80 points; 17% of the final grade), for a total of 480 points.

**Grading Scale:**

<table>
<thead>
<tr>
<th>Score Range</th>
<th>Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>480 - 424</td>
<td>A</td>
</tr>
<tr>
<td>423 - 376</td>
<td>B</td>
</tr>
<tr>
<td>375 - 328</td>
<td>C</td>
</tr>
<tr>
<td>327 - 280</td>
<td>D</td>
</tr>
<tr>
<td>279 or below</td>
<td>F</td>
</tr>
</tbody>
</table>
H. COURSE CONTENT/SCHEDULE

The lectures (titles and chapter numbers in parenthesis) listed in the schedule below correspond to the chapters of this book. Also, some of the material illustrated in the lectures and in the handouts is derived from the chapters of this book.

January
21  Review of the syllabus and course introduction (chapter 1)
26  Neurons and glia (chapter 2)
28  The neuronal membrane at rest (chapter 3)

February
2   The action potential (chapter 4)
4   Synaptic transmission (chapter 5)
9   Synaptic transmission (chapter 5, continued)
11  Neurotransmitter systems (chapter 6)
16  Exam 1: material covered in chapters 1 – 5 (introduction, neurons and glia; the neuronal membrane at rest; the action potential; synaptic transmission).
18  The structure of the nervous system (chapter 7 + Appendix)
23  The structure of the nervous system (chapter 7 + Appendix, continued)
25  The structure of the nervous system (chapter 7 + Appendix, continued)

March
2   The chemical senses (chapter 8)
4   The eye (chapter 9)
9   The central visual system (chapter 10)
11  Exam 2: material covered in chapters 6 – 9 (neurotransmitter systems; the structure of the nervous system; the chemical senses; the eye
16  No class, Spring break
18  No class, Spring break
23  The auditory and vestibular systems (chapter 11)
25  The auditory and vestibular systems (chapter 11, continued)
30  The somatic sensory system (chapter 12)

April
1   Spinal control of movements (chapter 13)
6   Brain control of movements (chapter 14)
8 Chemical control of the brain and behavior (chapter 15)

13 Exam 3: material covered in chapters 10 – 14 (the central visual system; the auditory and vestibular systems; the somatic sensory system; spinal control of movements; brain control of movements).

15 Brain mechanisms of emotion (chapter 18)

20 Memory systems (chapter 24)

22 Molecular mechanisms of learning and memory (chapter 25)

27 Mental illness (chapter 22)

29 Exam 4: material covered in chapters 15, 18, 24 and 25 (chemical control of the brain and behavior; brain mechanisms of emotion; memory systems; molecular mechanisms of learning and memory).

May

4 General review of the course material and questions in preparation to the final exam

13 Final Exam: 7:15 – 9:45 pm. Final Exam will be comprehensive and will also include questions on chapter 22 (mental illness).

Note: Changes in this course schedule may be necessary and will be announced to the class by the Instructor. The exams shown are directly related to the Student Learning Outcomes described in Section F.

I. COURSE POLICIES

Attendance/Tardiness
Students are expected to attend every class. When absent, it is the student’s responsibility to obtain missed information from a classmate. Missed information includes not only lecture notes, but also any possible information regarding changes to the agenda. The student is expected to arrive prepared to take notes and should bring textbook and handouts.

Late Work and Make-up Exams
1) In-class learning exercises. Regardless of the circumstances, students will not be allowed to make up the learning exercise(s) that they have missed. This rule applies to every exercise and to every student and no exceptions will be made. In case a student cannot attend class because he/she will be officially representing TAMU-CC (e.g., meetings or sports events), see rule (e) below.

2) Exams. This course does not include make-up exams. If you are not able to attend one of the exams, contact the instructor ASAP (see below). Points missed because of an unexcused absence (including tardiness and leaving early) cannot be recovered. Only unavoidable absences are excused, so you should schedule routine personal events (e.g., vacations, weddings, reunions, non-emergency medical or dental visits, parent-teacher conferences, household or auto repairs) to avoid conflicts with your classes. Oversleeping is never an acceptable excuse. Employment conflicts are not acceptable excuses for absences, tardiness, or leaving class early. Once enrolled in a class, it is the student’s responsibility to arrange his or her work schedule so that no regularly scheduled class, laboratory, or
examination time is missed. Texas waives jury duty for students, so jury duty is not an acceptable excuse. **Students must remember that it is their responsibility to know the course schedule on pages 4 and 5 of this syllabus. If you miss an exam because you forgot, or because you were not aware that it was scheduled for that day, you WILL NOT be allowed to make it up!** An excused absence allows the instructor to make alternative arrangements for completing assignments. The documentation required for an absence to be excused must be:

a) From an appropriate source (e.g., doctor, dentist, funeral director) who states the nature of the event that caused (or will cause) your absence.

b) In writing, on official stationery, and signed (I do not return excuses to you). Telephone calls, FAXes, and e-mails are not acceptable.

c) Presented prior to the absence for a scheduled event (e.g., university-sponsored activity recognized religious holiday, military service).

d) Presented no more than one week after the date of an unexpected absence.

e) In case a student cannot attend class because he/she will be officially representing TAMU-CC (e.g., meetings or sports events), the documentation required for an absence to be excused must be from the Office of Student Affairs. Refer to your student handbook on obtaining an excused absence from his office.

**Extra Credit**
No extra credit will be offered for this course

**Cell Phone/Laptop Use**
During lectures, computers and notebooks can be used to take notes. Cell phones and any other portable devices must be turned off and removed from the table. Cell/smart phones must be turned off at the beginning of class and remain so until the class is dismissed.

During exams or learning exercises, any portable device, including phones, computers, notebooks and tablets must be turned off and removed from the table for the entire duration of the exam/exercise.

**Scanning and photographs of any part of exams or exercises is prohibited!**

**Supplemental Instruction**
A Supplemental Instruction (SI) component has been established for this course. Contact information about the SI leader for this course will be provided on the first day of class. You will receive a schedule of SI sessions separately from this syllabus. Please take advantage of your SI leader’s expertise. To benefit from SI, students are recommended to attend SI sessions on a regular basis and do not wait until the session before an examination to start attending SI sessions. During SI sessions, your SI leader will review and discuss questions you had difficulty answering correctly.

**J. COLLEGE AND UNIVERSITY POLICIES**

- **Academic Integrity (University)**
  It is expected that university students will demonstrate a high level of maturity, self-direction, and ability to manage their own affairs. Students are viewed as individuals who possess the qualities of worth, dignity, and the capacity for self-direction in personal behavior.

  See Full University Policy at
Classroom/Professional Behavior
Texas A&M University-Corpus Christi, as an academic community, requires that each individual respect the needs of others to study and learn in a peaceful atmosphere. Under Article III of the Student Code of Conduct, classroom behavior that interferes with either (a) the instructor’s ability to conduct the class or (b) the ability of other students to profit from the instructional program may be considered a breach of the peace and is subjected to disciplinary sanction outlined in article VII of the Student Code of Conduct. Students engaging in unacceptable behavior may be instructed to leave the classroom.

Deadline for Dropping a Course with a Grade of W (University)
The grade of W will be assigned to any student officially dropping a course by Friday, April 10, 2015. No student is eligible to receive a W without completing the official drop process by this deadline. Visit the Office of the University Registrar for the Course Drop Form that must be submitted. After April 10, 2015 students will not be allowed to drop a course.

Grade Appeals (College of Science and Engineering)
As stated in University Procedure 13.02.99.C2.01, Student Grade Appeal Procedures, a student who believes that he or she has not been held to appropriate academic standards as outlined in the class syllabus, equitable evaluation procedures, or appropriate grading, may appeal the final grade given in the course. The burden of proof is upon the student to demonstrate the appropriateness of the appeal. A student with a complaint about a grade is encouraged to first discuss the matter with the instructor. For complete details, including the responsibilities of the parties involved in the process and the number of days allowed for completing the steps in the process, see University Procedure 13.02.99.C2.01, Student Grade Appeal Procedures. These documents are accessible through the University Rules website at http://www.tamucc.edu/provost/university_rules/index.html, and the College of Science and Engineering Grade Appeals webpage at http://sci.tamucc.edu/students/GradeAppeal.html. For assistance and/or guidance in the grade appeal process, students may contact the chair or director of the appropriate department or school, the Office of the College of Science and Engineering Dean, or the Office of the Provost.

Disability Services
Disability Services (DS) is the hub for coordinating services and accommodations to ensure accessibility and utilization of all programs for all Texas A&M University-Corpus Christi students with disabilities. Our services are designed to meet the unique educational needs of enrolled students with documented permanent or temporary disabilities. DS provides intake and consultation services to students seeking to register with our office. DS reviews an individual’s documentation of disability and assesses eligibility for services and the determination of reasonable accommodations. For more information visit the Disability Services Office at 116 Corpus Christi Hall or go to http://disabilityservices.tamucc.edu/
Final Exam

Students are not required to take more than two final examinations in any one day. The students who have three or more final examinations scheduled on the same day may request to take the final exam for this course on another day during the final examination period. The process is described below:

1) The student should first try to resolve the matter with the appropriate instructor(s). The schedule with the final exams for the Fall 2014 is available at: [http://registrar.tamucc.edu//final_exams/index.html](http://registrar.tamucc.edu//final_exams/index.html). Therefore, students should already know whether they have to reschedule their final exam. If this is the case, they are strongly encouraged to contact Dr. Mozzachiodi in a timely manner. Requests about rescheduling the final exam will not be considered if received after October 31, 2014.

2) If the matter remains unresolved, the student should submit a request for an alternative final exam time in writing to the Office of Student Affairs. This request must be submitted by the drop date, which is November 7, 2014.

3) The Office of Student Affairs will select which of the exams should be taken at an alternative time and formally contact the faculty member at least 15 working days before the final examination period. Preference for selection of which course would have an alternative final exam time must be based on the course with the smaller class size and, then, courses with final exam times in between other exams.

4) The faculty member will then arrange an alternative time for the student to take the final exam for that course that does not conflict with the student’s final exam schedule or require the student to take more than two final exams in one day. If students have difficulties in rescheduling the examination, they should consult with the Office of Student Affairs. Final exams given outside the regularly scheduled time may vary in content and format at the discretion of the faculty member.

K. OTHER INFORMATION

Academic Advising

The College of Science and Engineering requires that students meet with an Academic Advisor as soon as they are ready to declare a major. The Academic Advisor will set up a degree plan, which must be signed by the student, a faculty mentor, and the department chair. The College’s Academic Advising Center is located in the Center for Instruction, CI-350.

Religious Holidays

Any student who will miss class and/or test days because of recognized religious holidays should notify me as soon as possible so we can make alternative arrangements. Prior notification is required for such absences to be excused.

Academic Continuity

In the event of an unforeseen adverse event, such as a major hurricane and classes could not be held on the campus of Texas A&M University–Corpus Christi; this course would continue through the use of Blackboard and/or email. In addition, the syllabus and class activities may be modified to allow continuation of the course.
Instructor’s Notes
In choosing to take this course, you are agreeing to abide by the course rules, regulations, and standards. Should you have concerns or questions, you are encouraged to discuss them with the instructor as soon as possible. However, you are bound by these rules, regulations and standards from the first day of class throughout the duration of the course. Failure to comply with course rules or showing disrespect toward the instructor or other classmates will result in removal from the course.

GENERAL DISCLAIMER
I reserve the right to modify the information, schedule, assignments, deadlines, and course policies in this syllabus if and when necessary. I will announce such changes in a timely manner during regularly scheduled lecture periods.
