A. COURSE INFORMATION

Course number/section: COSC5356/001
Class meeting time: Monday through Thursday from 4:00 to 5:55 PM
Class location: Center for Instruction room 102
Course Website: TBD

B. INSTRUCTOR INFORMATION

Instructor: David R. Thomas
Office location: Center for Instruction Room 319
Office hours: TBD, or by appointment
Telephone: 361-825-2475
E-mail: david.thomas@tamucc.edu
Appointments: at lecture, by email or serendipity (please knock)

C. COURSE DESCRIPTION

Catalog Course Description
An introduction to theoretical foundations of modern computing. Topics include finite state machine concepts, formal grammars, and basic computability concepts.

Extended Course Description
This course concerns some fundamental properties and/or limitations shared by all digital computer systems. In our study we will not be concerned with questions concerning any particular hardware or software. Instead, we will answer questions such as those that follow.

(1) What are some relevant computational models for digital computation?
(2) What are the capabilities and limitations of a particular model?
(3) What is the complexity in both time and space of a particular solution to some problem?

In our course we will be mostly concerned with solutions to questions (1), and (2).

D. PREREQUISITES AND COREQUISITES

Prerequisites: MATH2305, Discrete Mathematics I;
COSC5321, Data Structures

Corequisites: none
E. REQUIRED TEXTBOOK(S), READINGS AND SUPPLIES

Optional Textbook(s) or Other References: none

Supplies none

F. STUDENT LEARNING OUTCOMES AND ASSESSMENT

By the end of this course, students should be able to:

1. Demonstrate knowledge of a framework for the theoretical analyses of relevant models of digital computation.

2. Perform detailed analyses of the capabilities of selected computational models.

3. Demonstrate knowledge of some general time-complexity characteristics of selected problems when solved using our models of computation.

G. INSTRUCTIONAL METHODS AND ACTIVITIES

Lecture and discussion, examination topic reviews, written examinations

H. MAJOR COURSE REQUIREMENTS AND GRADING

Course grades will be determined by three examinations concerning textbook material, lectures, and selected text problems. Each examination will contribute equally towards the final grade, which will be determined using a “traditional” 90%, 80%, 70%, … scheme. These examinations will occur (approximately) on the 7-th, 14-th and last class meeting.

I. COURSE CONTENT/SCHEDULE

We will proceed guided by the outline that follows. The integer at the left of a line indicates the appropriate textbook section.

Part 0: Introduction (Chapter 0, 2 meetings)

0. General Information
   0.1 Automata, Computability, and Complexity
   0.2 Mathematical Essentials
   0.3 Definitions, Theorems, and Proofs
   0.4 Methods for proof
Part 1: Automata and Languages
1. Regular Languages, (Chapter 1, 6 meetings)
   1.1 Finite Automata
   1.2 Nondeterminism
   1.3 Regular Expressions
   1.4 Nonregular Languages

2. Context-Free Languages (Chapter 2, 3 meetings)
   2.1 Context-free Grammars
   2.2 Pushdown Automata
   2.3 Non-context-free Languages

Part 2: Computability Theory
3. The Church-Turing Thesis (Chapter 3, 3 meetings)
   3.1 Turing Machines
   3.2 Variants of Turing Machines
   3.3 A Definition of Algorithm

4. Decidability (Chapter 4, 2 meeting)
   4.1 Decidable Languages
   4.2 The Halting Problem

Part 3: Complexity Theory
5. Time Complexity (Chapter 7, 3 meetings)
   7.1 Measuring Complexity
   7.2 The Class P
   7.3 The Class NP
   7.4 NP-completeness

Note:
Changes in this course schedule may be necessary and will be announced to the class by
the Instructor. The assignments and exams shown are directly related to the Student
Learning Outcomes described in Section F.
J. COURSE POLICIES

Everyone is expected to conduct themselves in a manner appropriate for University Students. Hence, should you arrive late please enter quietly.

K. COLLEGE AND UNIVERSITY POLICIES

- **Academic Integrity (University)**
  University students are expected to conduct themselves in accordance with the highest standards of academic honesty. Academic misconduct for which a student is subject to penalty includes all forms of cheating, such as illicit possession of examinations or examination materials, falsification, forgery, complicity or plagiarism. (Plagiarism is the presentation of the work of another as one’s own work.) In this class, academic misconduct or complicity in an act of academic misconduct on an assignment or test will result in a failing grade.

- **Classroom/Professional Behavior**
  Texas A&M University-Corpus Christi, as an academic community, requires that each individual respect the needs of others to study and learn in a peaceful atmosphere. Under Article III of the Student Code of Conduct, classroom behavior that interferes with either (a) the instructor’s ability to conduct the class or (b) the ability of other students to profit from the instructional program may be considered a breach of the peace and is subject to disciplinary sanction outlined in article VII of the Student Code of Conduct. Students engaging in unacceptable behavior may be instructed to leave the classroom. This prohibition applies to all instructional forums, including classrooms, electronic classrooms, labs, discussion groups, field trips, etc.

- **Statement of Civility**
  Texas A&M University-Corpus Christi has a diverse student population that represents the population of the state. Our goal is to provide you with a high quality educational experience that is free from repression. You are responsible for following the rules of the University, city, state and federal government. We expect that you will behave in a manner that is dignified, respectful and courteous to all people, regardless of sex, ethnic/racial origin, religious background, sexual orientation or disability. Behaviors that infringe on the rights of another individual will not be tolerated.

- **Deadline for Dropping a Course with a Grade of W (University)**
  The grade of W will be assigned to any student officially dropping a course. Please consult with the instructor before you decide to drop to be sure it is the best thing to do. Just stopping attendance and participation WILL NOT automatically result in your being dropped from the class. Should dropping the course be the best course of action, visit the Office of the University Registrar for the Course Drop Form that must submitted. No student is eligible to receive a W without completing the official drop process by this deadline. Please consult the Academic Calendar (http://www.tamucc.edu/academics/calendar/) for the last day to drop a course.
Grade Appeals (College of Science and Engineering)

As stated in University Procedure 13.02.99.C2.01, Student Grade Appeal Procedures, a student who believes that he or she has not been held to appropriate academic standards as outlined in the class syllabus, equitable evaluation procedures, or appropriate grading, may appeal the final grade given in the course. The burden of proof is upon the student to demonstrate the appropriateness of the appeal. A student with a complaint about a grade is encouraged to first discuss the matter with the instructor. For complete details, including the responsibilities of the parties involved in the process and the number of days allowed for completing the steps in the process, see University Procedure 13.02.99.C2.01, Student Grade Appeal Procedures. These documents are accessible through the University Rules website at http://www.tamucc.edu/provost/university_rules/index.html, and the College of Science and Engineering Grade Appeals webpage at http://sci.tamucc.edu/students/GradeAppeal.html. For assistance and/or guidance in the grade appeal process, students may contact the chair or director of the appropriate department or school, the Office of the College of Science and Engineering Dean, or the Office of the Provost.

Disability Services

The Americans with Disabilities Act (ADA) is a federal anti-discrimination statute that provides comprehensive civil rights protection for persons with disabilities. Among other things, this legislation requires that all students with disabilities be guaranteed a learning environment that provides for reasonable accommodation of their disabilities. If you believe you have a disability requiring an accommodation, please call (361) 825-5816 or visit Disability Services in Corpus Christi Hall 116.

If you are a returning veteran and are experiencing cognitive and/or physical access issues in the classroom or on campus, please contact the Disability Services office for assistance at (361) 825-5816.

http://disabilityservices.tamucc.edu/

Statement of Academic Continuity

In the event of an unforeseen adverse event, such as a major hurricane and classes could not be held on the campus of Texas A&M University–Corpus Christi; this course would continue through the use of Blackboard and/or email. In addition, the syllabus and class activities may be modified to allow continuation of the course. Ideally, University facilities (i.e., emails, web sites, and Blackboard) will be operational within two days of the closing of the physical campus. However, students need to make certain that the course instructor has a primary and a secondary means of contacting each student.
I. OTHER INFORMATION

None

M. GENERAL DISCLAIMER

I reserve the right to modify the information, schedule, assignments, deadlines, and course policies in this syllabus if and when necessary. I will announce such changes in a timely manner during regularly scheduled lecture periods.
