I. Course Description
This course provides counselors who will work in community settings with an understanding of the historical and philosophical background of clinical mental health counseling. It will cover the forces that influence the development of community counseling, the role of the mental health counselor, professional issues unique to mental health counseling, client characteristics, principles, community needs assessment, and program development.

II. Rationale:
Mental health counselors must understand the foundations and contextual dimensions of community counseling, as well as possess appropriate knowledge and skills. Factors of diversity; structural models, methods and principles of program development and service delivery; and effective strategies for client advocacy in public policy are all requisite for effectiveness in this specialized role.

III. State Adopted Proficiencies for Counselors:

Learner-Centered Knowledge:
1. Counseling students understand human developmental patterns and use this knowledge base to create developmentally appropriate counseling agendas.

Learner-Centered Process:
2. Counseling students learn to create an environment, which supports and encourages exploring options, sharing new ideas, and innovative problem solving.
3. Counseling students learn to utilize group counseling as a means of utilizing available human resources to provide maximum counseling services.

Learner-Centered Planning:
4. Counseling students learn to help diverse groups of clients set short-term, intermediate, and long-term goals; monitor progress toward their goals; and make necessary adjustments.

Learner-Centered Responsive Services:
5. Counseling students learn to help diverse groups of clients transfer learning to other situations.
6. Counseling students learn to help diverse groups of clients clarify problems and implement change.
7. Counseling students learn to help diverse groups of clients by understanding the referral process and when and where to refer clients.
8. Counseling students learn to help diverse groups of clients to monitor their own progress.

Learner-Centered System Support:
9. Counseling diverse groups of students learn to work as part of a collaborative team including learners, administrators, teachers, other school personnel, parents, guardians, and community members.
10. Counseling students learn to survey diverse groups of community members to determine needs that can be addressed by the counseling program and to develop broad goals related to priority needs and measurable objectives related to each goal.
Learner-Centered Professional Development:
11. Counseling students learn professional ethics and law related to counseling in public schools and community agencies.
13. Counseling students learn and study case studies related to professional counseling.

Equity in Excellence for All Learners:
15. Counseling students learn to respect all learners, be sensitive to their needs, and to encourage them to use all their skills and talents.

Learner-Centered Communication:
16. Counseling students learn active listening skills, open communication, empathic responding, caring confrontation, and conflict resolution.

IV. TExES Competencies

Standard I. Learner-Centered Knowledge: The certified school counselor has a broad knowledge base. The certified school counselor must know and understand:
(1) the history of counseling;
(2) counseling and consultation theories and practices;
(3) career development theories and practices;
(4) assessment principles and procedures, including the appropriate use of tests and test results;
(5) changing societal trends, including demographic, economic, and technological tendencies, and their relevance to school counseling;
(6) legal and ethical standards, practices, and issues;
(7) the characteristics and educational needs of special populations;
(8) the roles and responsibilities of the counselor in a developmental guidance and counseling program that is responsive to all students; and

Standard II. Learner-Centered Skills: The certified school counselor applies the knowledge base to promote the educational, personal, social, and career development of the learner. The certified school counselor must:
(3) counsel individuals and small groups using appropriate counseling theories and techniques in response to students' needs;
(4) consult with parents/guardians, teachers, administrators, and other individuals as appropriate to enhance their work with students;
(5) coordinate resources for students within the school and community;
(8) use varied sources of information about students for assessment purposes;

Standard III. Learner-Centered Process: The certified school counselor participates in the development, monitoring, and evaluation of a developmental school guidance and counseling program that promotes learners' knowledge, skills, motivation, and personal growth. The certified school counselor must:
(1) collaborate with others in the school and community to implement a guidance curriculum that promotes learners' development in all domains, including cognitive, social, and emotional areas;
(2) facilitate learners' ability to achieve their potential by helping them set and attain challenging educational, career, and personal/social goals based on various types of information;
(3) use both preventive and intervening strategies to address the concerns of learners and to help them clarify problems and situations, set goals, explore options, and implement change;
(4) implement effective referral procedures to facilitate the use of special programs and services; and
(5) act as a consultant and/or coordinator to help learners achieve success inside and outside of school.

Standard IV. Learner-Centered Equity and Excellence for All Learners: The certified school counselor promotes academic success for all learners by acknowledging, respecting, and responding to diversity while building on similarities that bond all people. The certified school counselor must:
(2) advocate for a school environment in which diversity is acknowledged and respected, resulting in positive interactions across cultures; and
(3) facilitate learning and achievement for all students, including special populations, by promoting a cooperative, inclusive, and purposeful learning environment.

Standard V. Learner-Centered Communications: The certified school counselor, an advocate for all students and the school, demonstrates effective professional and interpersonal communication skills. The certified school counselor must:
(2) use knowledge of group dynamics and productive group interaction;
(3) support responsive interventions by effectively communicating with parents/guardians, teachers, administrators, and community members;
(4) facilitate learners' access to community resources;
(7) develop partnerships with parents/guardians, businesses, and other groups in the community to facilitate learning; and
(8) work effectively as a team member to promote positive change for individuals, groups, and the school community.

Standard VI. Learner-Centered Professional Development: The certified school counselor continues professional development, demonstrating a commitment to learn, to improve the profession, and to model professional ethics and personal integrity. The certified school counselor must:
(1) use reflection, self-assessment, and interactions with colleagues to promote personal professional development;
(3) strive toward the highest level of professionalism by adhering to and modeling professional, ethical, and legal standards;

V. Course objectives and Outcomes

This course is designed to meet CACREP II, 2009 standards and infuses the State Adopted proficiencies and the TExES competencies enable students to demonstrate knowledge and skills in the following areas:

A-1: Comprehends history, philosophy, and current trends in clinical mental health counseling. Students know essential facts regarding history, philosophy and current developments as measured by a successful passing rate of 80% on a comprehensive exam and class discussion participation grade.
A-2: Comprehends ethical and legal considerations specifically related to the practice of clinical mental health counseling. Students identify ethical and legal issues related to clinical mental health counseling as measured by a successful passing rate of 80% on a comprehensive exam and class discussion participation grade.
A-3: Knows roles, functions, of clinical mental health counseling in various practice settings and importance of relationships between counselors and other professionals, including interdisciplinary treatment teams. Students can describe professional roles and functions across various treatment settings as measured by a successful passing rate of 80% on a comprehensive exam and community need/agency response research project.
A-4: Knows professional organizations, preparation standards, and credentials that are relevant to the practice of clinical mental health counseling. Students can list professional organizations, standards and credentials relevant to clinical mental health counseling as measured by a successful passing rate of 80% on a comprehensive exam and class discussion participation grade.

A-5: Comprehends a variety of models and theories related to clinical mental health counseling, including methods, models, and principles of clinical supervision. Students can discuss various treatment models and theories, including those associated with supervision, as measured by a successful passing rate of 80% on a comprehensive exam and class discussion participation grade.

A-7: Identifies professional issues that affect clinical mental health counselors (e.g., core provider status, expert witness status, access to and practice privileges within managed care systems). Students will explain professional issues affecting clinical mental health counselors as measured by a successful passing rate of 80% on a comprehensive exam and community need/agency response research project.

A-8: Comprehends management of mental health services and programs, including areas such as administration, finance, and accountability. Students demonstrate understanding of implementation of mental health services and programs as measured through a successful passing rate of 80% on a comprehensive exam and community need/agency response research and HIPPA projects.

A-9: Comprehends the impact of crises, disasters, and other trauma-causing events on people. Students identify the effects of crises, disasters and traumatic events as measured by a successful passing rate of 80% on a comprehensive exam, group project and class discussion participation grade.

A-10: Comprehends the operation of an emergency management system within clinical mental health agencies and in the community. Students can explain agency and community emergency management systems as measured by a successful passing rate of 80% on a comprehensive exam, group project, and class discussion participation grade.

B-1: Demonstrates the ability to apply and adhere to ethical and legal standards in clinical mental health counseling. Students identify and apply legal and ethical standards applicable to the clinical mental health counseling profession as measured by a successful passing rate of 80% on a comprehensive exam and class discussion participation grade.

B-2: Applies knowledge of public mental health policy, financing, and regulatory processes to improve service delivery opportunities in clinical mental health counseling. Students demonstrate and understanding of public mental health policy, financing, and regulations as measured by a successful passing rate of 80% on the class discussion participation grade, Group HIPPA project, and community need/agency response research project.

C-1: Describes the principles of mental health, including prevention, intervention, consultation, education, and advocacy, as well as the operation of programs and networks that promote mental health in a multicultural society. Students demonstrate knowledge of the principles of mental health including prevention, intervention, consultation, education, and advocacy as measured by a successful passing rate of 80% on a comprehensive exam, class discussion participation grade, and community need/agency response research project.

C-2: Knows the etiology, the diagnostic process and nomenclature, treatment, referral, and prevention of mental and emotional disorders. Students demonstrate knowledge of etiology and diagnostic processes in the case conceptualization and prevention of mental/emotional disorders as measured by a successful passing rate of 80% on a comprehensive exam.

C-3: Knows the models, methods, and principles of program development and service delivery (e.g., support groups, peer facilitation training, parent education, self-help). Students will identify the models and methods of program development and service delivery as measured by a successful passing rate of 80% on a comprehensive exam and class discussion participation grade.

C-5: Understands the range of mental health service delivery-such as inpatient, outpatient, partial treatment and aftercare-and the clinical mental health counseling services network. Students will explain the range of service delivery in the continuum of care as measured by a successful passing rate of 80% on a comprehensive exam, class discussion participation grade, and case study project.

C-6: Understands the principles of crisis intervention for people during crises, disasters, and other trauma-causing events. Students identify crisis intervention principles as measured by a successful passing rate of 80% on a comprehensive exam and class discussion participation grade.
C-8: Recognizes the importance of family, social networks, and community systems in the treatment of mental and emotional disorders. Students explain the importance of family, social, and community systems in treatment as measured by a successful passing rate of 80% on a comprehensive exam, class discussion participation grade, and case study project.

C-9: Understand professional issues relevant to the practice of clinical mental health counseling. Students can enumerate professional issues relevant to clinical mental health counseling a successful passing rate of 80% on a comprehensive exam and class discussion participation grade,

D-1: Applies the principles and practices of diagnosis, treatment, referral, and prevention of mental and emotional disorders to initiate, maintain, and terminate counseling. Students explain the procedures associated with diagnosis, treatment, referral and prevention as measured by a successful passing rate of 80% for a case study project and class discussion participation evaluation.

D-2: Applies multicultural competencies to clinical mental health counseling involving case conceptualization, diagnosis, treatment, referral, and prevention of mental and emotional disorders. Students understand and apply principles of multicultural competencies to case conceptualization, diagnosis, treatment, and prevention as measured by a successful passing rate of 80% for a case study project and class discussion participation evaluation.

D-7: Applies current record-keeping standards related to clinical mental health counseling. Students demonstrate and understanding of current record keeping standards as measured by a successful passing rate of 80% on a comprehensive exam and class discussion participation grade.

E-1: Understands how living in a multicultural society affects clients who are seeking clinical mental health counseling services. Students explain how a multicultural society affects clientele in clinical mental health services as measured by a successful passing rate of 80% for a case study project and class discussion participation evaluation.

E-2: Understands the effects of racism, discrimination, sexism, power, privilege, and oppression on one’s own life and career and those of the client. Students demonstrate understanding of the effects of racism, discrimination, sexism, power, privilege, and oppression on one’s own life and career, and those of the client, as measured by a successful passing rate of 80% for a case study project and class discussion participation evaluation.

E-4: Understands effective strategies to support client advocacy and influence public policy and government relations on local, state, and national levels to enhance equity, increase funding, and promote programs that affect the practice of clinical mental health counseling. Students explain strategies to support client and professional advocacy and promote public policies/governmental relations as measured by a successful passing rate of 80% for a class discussion participation evaluation.

E-5: Understands the implications of concepts such as internalized oppression and institutional racism, as well as the historical and current political climate regarding immigration, poverty, and welfare. Students detail an understanding of internalized oppression and institutional racism as measured by a successful passing rate of 80% for a class discussion participation evaluation.

E-6: Knows public policies on the local, state, and national levels that affect the quality and accessibility of mental health services. Students list public policies on multiple governmental levels and effects thereof as measured by a successful passing rate of 80% for a class discussion participation evaluation.

F-1: Organizes information regarding community resources to make appropriate referrals. Students organize and understand information regarding community resources for client referrals as measured by a successful passing rate of 80% for a class discussion participation evaluation and community need/agency response research project.

F-2: Applies policies, programs, and services that are equitable and responsive to the unique needs of clients. Students identify and use policies, programs, and services responsive to unique client needs as measured by a successful passing rate of 80% for a class discussion participation evaluation and case study project.

G-1: Knows the principles and models of assessment, case conceptualization, theories of human development, and concepts of normalcy and psychopathology leading to diagnoses and appropriate counseling treatment plans. Students identify the principles/models of assessments, case conceptualization, knowledge of development, and psychopathology as measured by a successful passing rate of 80% on a comprehensive exam, case study project, and class discussion participation grade.

G-2: Understands various models and approaches to clinical evaluation and their appropriate uses, including diagnostic interviews, mental status examinations, symptom inventories, and psychoeducational and personality assessments.
Students demonstrate knowledge of various models to clinical evaluation and appropriate usage as measured by a successful passing rate of 80% on a comprehensive exam, case study project, and class discussion participation grade.

H-1: Selects appropriate comprehensive assessment interventions to assist in diagnosis and treatment planning, with an awareness of cultural bias in the implementation and interpretation of assessment protocols. Students identify various appropriate comprehensive assessment interventions for diagnosis and treatment planning as measured by a successful passing rate of 80% on a comprehensive exam, case study project, and class discussion participation grade.

H-4: Applies the assessment of a client’s stage of dependence, change, or recovery to determine the appropriate treatment modality and placement criteria within the continuum of care. Students recognize a client’s state of dependence, change, or recovery, and can recommend appropriate treatment and placement, as measured by a successful passing rate of 80% on a comprehensive exam, case study project, and class discussion participation grade.

I-1: Understands how to critically evaluate research relevant to the practice of clinical mental health counseling. Students explain how to critically evaluate research relevant to the field as measured by a successful passing rate of 80% on a comprehensive exam and class discussion participation grade.

I-2: Knows models of program evaluation for clinical mental health programs. Students list models of program evaluation as measured by a successful passing rate of 80% on a comprehensive exam and class discussion participation grade.

I-3: Knows evidence-based treatments and basic strategies for evaluating counseling outcomes in clinical mental health counseling. Students demonstrate understanding of evidence-based protocols and evaluation of outcomes as measured by a successful passing rate of 80% on a comprehensive exam, assigned projects, and class discussion participation grade.

J-2: Identifies measurable outcomes for clinical mental health counseling programs, interventions, and treatments. Students list measurable outcomes for clinical mental health counseling programs, interventions, and treatments, as measured by a successful passing rate of 80% on a comprehensive exam, case study project, and class discussion participation grade.

J-3: Analyzes and uses data to increase the effectiveness of clinical mental health counseling interventions and programs. Students analyze and use data to increase the effectiveness of clinical mental health counseling interventions and programs by successful completion of community need/agency response research project and take home examination as evaluated by rubrics.

K-5: Understands appropriate use of diagnosis during a crisis, disaster, or other trauma-causing event. Students explain appropriate diagnosis and interventions during a crisis, disaster or traumatic event as measured by a successful passing rate of 80% on a comprehensive exam and class discussion participation grade.

L-3: Differentiates between diagnosis and developmentally appropriate reactions during crises, disasters, and other trauma-causing events. Students can clarify differences between diagnoses and developmentally appropriate reactions during disasters, crises, and traumatic events as measured by a successful passing rate of 80% on a comprehensive exam and class discussion participation grade.

VI. Course Topics

The major topics to be considered are:

VII. Instructional Methods and Activities

*Methods and activities for instruction include:*
A. Traditional Experiences (lecture/discussion; demonstration; guest speaker; on-line deliveries; video, etc)
B. Clinical Experiences (simulations; cooperative groups; student demonstrations or presentations; role play; value clarifications)
C. Field Experiences (community resources; case studies)

VIII. Evaluation and Grade Assignment

*The methods of evaluation and the criteria for grade assignment are as follows:*

**Article Discussion/Participation:** You will be responsible for attending each class and being prepared to contribute to class discussion by completing the assigned reading material on the session topic. Absences, tardy arrivals, and early departures will be calculated into the final points given for participation. **Worth 20 points total.**

**Topic Quizzes:** GIVEN ON BLACK BOARD DISCUSSION: Students are to be prepared for a written true/false, multiple choice, short answer “topic quiz,” given intermittently during the course. (These short tests will not be announced prior to the class session in which they are given.) Scores on each oral/written topic quiz, as well as unexcused absences and tardy arrivals, will be calculated into points given for participation. Promptness is expected, as is staying for the entire class. (Attendance may be taken at the end of a class session.) Students are to email the instructor prior to a class session for an excused absence. More than 2 absences will lower the student’s grade by 10 points or more. Please see Class Policies for further details. **Worth 30 points total.**

**Examinations.** GIVEN ON BLACK BOARD: There are two examinations, 50 points each, a midterm and a final. The exams will cover material from textbook, lecture, discussion and presentations. Questions are multiple choice, true/false, and short answer to prepare you for the licensure exam.

*****Group Projects*****

*As directed by the instructor, students will be randomly assigned groups to complete following three projects. Please form different pairs/groups for Projects 1, 2 and 3. Simply stated, any group members from Project 1 may NOT be in your Project 2 or 3 group. Please work with different people. Please submit the “Group Evaluation by Members” form at the end of the semester for each of the projects.*

Please read Class Policies re: managing possible problems between group members. Remember to consult the instructor EARLY in the semester if problems arise—don’t wait until it is too late to take action. Learning to effectively work in groups is part of professional skills development.

**Project 1: HIPPA Risk Management Presentation:** Students will collaborate in groups of 3-4, to provide informational materials on HIPPA phase 2, regarding risk management. This will be presented to the class in PowerPoint presentation that should be at least 15 minutes long. **Worth 20 points total.**

**Project 2: Community need/agency visits.** Each group will clarify and research one specific social issue creating a mental health need in our community, e.g. domestic violence, family mental health needs, teenage pregnancy, justice system, etc. (1) Groups will visit two agencies addressing this need. (2) Each group will prepare a eight to ten page paper (APA 6th edition) on the specific social issue in the community, providing local statistics as well as research from governmental agencies/scholarly sources. In the paper, include accurate information on the local agencies and how
counselors are working to mitigate the mental health issues associated with the selected social issue. Feel free to share your impressions on the quality of the services offered by each agency—positive, negative, or between. Please be sure to provide citations to support your evaluation. Also, please be cautioned to do in-depth research and provide accurate information. For example, if a student is confused and unintentionally interviews counselors working in two departments from the same agency, it is still considered a single agency. Students should familiarize themselves with background information about both counseling and business functions of the agency such as divisions/hierarchy of the organization, funding sources, employee functions, etc., and gather this information from two or more sources (not just the internet). Not all group members need to engage in every activity, e.g. some students may visit agencies while others do library research. Please note that, if one of the group members is working or volunteering at a particular agency, the group may not use that agency as part of this project. Remember the need for analyzing and using current relevant data as you evaluate the effectiveness of the agency’s work, such as in their use of evidence-based protocols. Your research should include background information relevant to the counseling profession and relevant information about the topic from scholarly, governmental, and professional association sources that is current; specifically, the copyright date on your sources should be less than eight years old. Your project should cite a minimum of six references meeting the above criteria must be incorporated into your paper. (This is in addition to the textbook(s) and supplemental material provided by the instructor, such as what is posted on Blackboard.) You may also use one publication from each agency you visit. An informal discussion will be held at the end of the course for groups to share their findings with other students to increase awareness of community issues and resources. A formal presentation such as a PowerPoint is not needed for this discussion. This project is worth 45 points.

Note: The group will post your agency information under Blackboard discussion for then each member of the group needs to enter an informational thread. (Worth 5 points)

**Project 3: Crisis/Disaster Counseling Group Presentation:** Each group will select and research a crisis or disaster counseling topic from the list provided below. Each group will share their findings in a PowerPoint presentation that should be at least 30 minutes long. In addition to the textbook and classroom information, student will utilize information from a minimum of 4 professional journals (articles must be no less than 5 years old) focused on counseling needs and services in crisis or disaster counseling. Governmental resources can also be used. This project is worth 30 points

- Response to suicide in schools (elementary, middle, or high school)
- Response to traumatic events on college campuses (shootings, student suicide, bullying, racially motivated)
- Response to natural disaster (hurricane, flooding, fire, etc.)
- Response to human made disaster (mass shootings, etc.)
- Response to traumatic events in the community (mass shootings, dignitary unexpected loss, sexual assault, domestic violence, etc.)

**B. Method of Evaluation:**

- Exam I & II (50 each) 100 points
- Quizzes 30 points
- Group Project I 20 points
- Group Project II 45 points
- Black board information 5 points
- Group Project III 30 points
- Class Participation 20 points
- Total 250 points

**Statement of Civility**

Texas A&M-Corpus Christi is a comprehensive urban university located on the South Texas Gulf Coast focusing on the higher education needs of South Texas and the State. Our student body represents the diversity of our State, and will provide its future leaders. Together, the students, faculty and staff from our campus community, reflect a variety of backgrounds and cultures. The quality of life on and about the campus is best served by courteous and dignified interaction between all individuals, regardless of sex, ethnic or religious background, sexual orientation, or disability.

It is the expectation of this University that all members of the campus community will work to develop and maintain a high degree of respect and civility for the wealth of diversity in which we are all fortunate to live and work. To ensure that this expectation is met, the University will take whatever action is necessary to prevent, correct, and discipline behavior which violates the spirit and intent of regulations designed to promote respect and civility, and will take whatever steps are necessary to foster mutual respect among the campus community.

*This policy also applies to interaction with guest speakers and members of our community.*

**Class Policies**

**Accommodations**

The **Americans with Disabilities Act (ADA)** is a federal anti-discrimination statute that provides comprehensive civil rights protection for persons with disabilities. Among other things, this legislation requires that all students with disabilities be guaranteed a learning environment that provides for reasonable accommodation of their disabilities. If you believe you have a disability requiring an accommodation, please call or visit Disability Services at (361) 825-5816 in Driftwood 101. If you are a returning veteran and are experiencing cognitive and/or physical access issues in the classroom or on campus, please contact the Disability Services office for assistance at (361) 825-5816.

**Students needing special accommodations** should make arrangements at the beginning of the semester—at least one week prior to specified deadlines for examinations or assignments. (Please do not approach the instructor and ask for special accommodations after a deadline has been missed, or if a student is unhappy with a grade, etc.) Students with mobility, communication, learning, and health issues that qualify under the Americans with Disabilities Act need to make arrangements through the appropriate university office and provide the required paperwork to the instructor—prior to the deadline for the assignment or examination.

Students needing accommodations for situations that may not qualify under ADA definitions, such as needing special translation services, are reminded to make arrangements with the instructor at least one week before posted deadlines.
**Attendance**

You will be responsible for attending each class and being prepared to contribute to group and/or class discussion by completing the assigned reading material on the session topic prior to class. Counseling/therapy in various venues requires a high level of personal responsibility within the profession to maintain client welfare. You will be graded on participation, professional/ethical conduct, and preparation for discussion.

Class attendance is mandatory. It is the student’s responsibility to be present if roll is called or to sign an attendance roster when distributed. To receive an “excused absence” for a class session, or to explain need for tardiness/leaving early, notification must be given via email BEFORE the class session—do not just casually notify the instructor verbally. Unexcused absences, and multiple incidents of tardiness/leaving early, will affect points given for participation. *Promptness is expected, as is staying for the entire class.*

However, please be respectful and do NOT come to class if you are ill, and please do not bring a sick child to class. If using the protocol described to inform the instructor, illness would be considered an excused absence. Please consider the wellbeing of the group; please do not expose fellow students to a possibly contagious illness.

**If there is tardiness or absence for any reason (excused or unexcused), it is the student’s responsibility to have a thorough understanding of material covered during the missed class time and to obtain handouts, notes, etc., from another student. When absent, students are still responsible for assignment deadlines.**

**Confidentiality**

Maintaining confidentiality is expected. Participating in group activities involves some level of self-disclosure. A level of trust and openness is needed as a part of the learning process, and it is important that confidentiality be maintained. Taking photographs and making audio/video recordings during class are not allowed unless there is full disclosure and prior consent given by all parties involved. If you wish to share with others outside the class, discuss only your own reactions or experiences and maintain confidentiality regarding other’s input. *This is an ethical issue.*

**Professional Courtesy**

Please be respectful and turn off cell phones, pagers, and other electronic media devices during class. *Students who talk on the phone, text messages during a class session, or are using any sort of media device, rather than participating in classroom activities, will be asked to leave the class session and will not be given credit for attending that session.* In case of being on-call for work or a family emergency, to maintain professional courtesy, the correct protocol is to inform the instructor before class, put the phone on “silent notification” or “vibrate,” and quietly leave the room to talk or text.

*Please be courteous and pick up your trash such as paper, food/drink containers.* The instructor should not have to pick up your trash for the room to be left neat and clean for others.

A free exchange of ideas in the classroom is needed to understand different viewpoints and explore a variety of perspectives. Therefore, verbal or physical aggression will not be tolerated. Actions such as cursing or a demeaning verbal attack on any individual or group will result in the student being asked to leave the class session, and the student will not be given credit for attendance or assignments/examinations due that session. Such infractions may also result in other disciplinary or remedial actions. Please refer to the Statement of Civility.

In addition, attire should conform to common community standards as to what would be appropriate for a young child to see. Individuals wearing attire that does not meet these reasonable standards, such as clothing showing obscene words or images, will result in the student being asked to leave the class session, and the student will not be given credit for attendance or assignments/examinations due that session.
**Academic Honesty**

Any material—a sentence, paragraph, chart, drawing, photograph—that is copied or quoted from any print or electronic source, or resulting from another party’s efforts, must have the associated citation/reference—or this is considered plagiarism and subject to disciplinary action as described in the current university catalog. For example, if a student uses software with a copy/paste function to take another person’s work from the internet and the student claims/intimates that the work is his/her own, this is committing plagiarism. Each student is responsible for completing his or her own assignments for class. If a student asks another individual to complete work that will be misleadingly labeled as the student’s own efforts, this is a form of academic dishonesty.

Unless an assignment is explicitly described as a group project, each student is required to do his or her own work on assignments and take-home examinations. Given the ethics and accepted standard of conduct for our profession, any overture to unfairly collaborate, such as to give or get “help” on an assignment that is intended to be individual work, is academic dishonesty.

In a profession in which fidelity and trustworthiness are essential, if a student has knowledge of an act of academic dishonesty, the student is obligated to report the dishonesty to the instructor.

A grade of “0” or “F” will be given in cases of academic dishonesty, such as described above, or for work that has been previously submitted in another class and is being resubmitted for a current assignment. Students may be required to use specified software to verify that work was not plagiarized. Students will be given instructions regarding registration and instructions on use of the software.

**Assignments**

**Each student is responsible for having access to a computer to retrieve class information posted electronically, such as through Blackboard, and to verify that the student’s email address that is registered with the university system is a current (and working) email address so the instructor can use the university’s “email class” function to send class notices and required/supplemental material—or each student must get the material from another student in the class.** Do not ask the instructor to make individual copies or re-send material to individual students.

Required reading/supplemental material will be noted as such when emailed or posted. Please be reminded that required and supplemental material is intended to expand the students’ knowledge base, promote critical thinking skills, and foster discussion. As such, a wide variety of viewpoints will be presented. The information is provided for general educational purposes, and opinions expressed by these authors cannot be assumed to represent the views of the instructor or university.

Examinations, papers, and assignments with a due date specified in the syllabus, will not be accepted after the due date. Students are given ample notification of course requirements and due dates. Students with an unexcused absence during examinations will not be able to take a make-up exam. (Please do not ask to be an exception to this requirement.) For a student with an excused absence, it is the student’s responsibility to make arrangements with the instructor to take a make-up exam or quiz.

All work, such as papers and reference lists, will be typed in the current APA format. If correct APA style is not used, the overall grade on the assignment will be lowered. Students’ work (papers, typed responses to examinations, and the like) must have all necessary references/citations in correct APA style, current edition, when outside sources are quoted or used for reference. Please do not turn in a copy of the original resource of cited information to the instructor, such as a copy of a journal article, unless specifically instructed to do so. Points may be deducted if students do not write at a collegiate level, using complete sentences, correct grammar/punctuation, and proofreading spelling.
Students are reminded that they are at an educational level at which references should come from professional/scholarly sources. In other words, use peer-reviewed journals, professional texts, and the like. Using popular resources of sometimes questionable merit, such as the several internet “encyclopedias” that are appropriate for students in high school, will result in the loss of points on your grade.

A paper copy of reports, examinations, and assignments (not an electronic copy) is due on or before the specified date, with multiple pages stapled. Work should not be unbound, nor should a paper clip be used. Do not use a plastic report cover or put assignments in any sort of folder. For assignments, when the number of pages is specified, this refers to the body of the work, and not reference lists, title page, etc.

Students’ assignments, such as examinations, papers, and other assignments, will only be kept for two weeks after the last class meeting of the course. After this time, for confidentiality, students’ work will be shredded. If a student wants to retrieve a graded assignment after the last class session, arrangements need to be made at least one week before the due date of the project.

For examinations and all assignments, it is the student’s responsibility to be sure to put their name on their work or test form and to “bubble in” the name on a scantron in order to receive a grade. It is also the student’s responsibility to have a pencil available every class session for unannounced quizzes, write legibly, and complete computer-graded forms so they can be scored accurately. Also, it is the student’s responsibility to submit a scantron that can be electronically graded, that is, no folding, tearing, wrinkling, and the like. If a scantron form is damaged or not properly identified, the test will not be graded and considered “no credit.” If there is talking during an examination or unauthorized use of written material such as notes, texts, etc., the student will be asked to leave and will fail that examination with the grade of zero. In most cases, the student will be asked to not write on the original test so it can be reused.

For PowerPoint presentations, because of university equipment variability, please store PowerPoint presentations on two types of electronic media such as CD and memory stick. If you are giving a presentation that requires equipment such as a PowerPoint projector, computer (and if internet connection is needed) it is the student’s responsibility to notify the instructor by email at least one week prior to your presentation date so that arrangements can be made.

Incomplete grades will be granted only when extraordinary circumstances arise and are the exception to the rule. Be aware that incomplete grades require paperwork from the student as well as from the professor, it is the student’s responsibility to meet with the instructor at least two weeks prior to the deadline for turning in grades if an incomplete is a necessity.

Group Work

When group work is assigned, there are occasional problems with one or more members not being responsible to the others in the group. If there are problems with an individual not attending meetings or not completing assignments by an agreed date, etc., students are reminded to inform the instructor as soon as possible. Do not wait until shortly before the assignment deadline to inform the instructor because then it is too late for remedial action. It is each student’s individual responsibility to notify the instructor in a timely manner if it appears that certain group members are not contributing to a class project. In addition, when group work is assigned, students will also be asked to complete a confidential evaluation form of fellow group members. (For those group members who are not responsible for completing their equitable share of work, those members will lose points on their grade.)

Communication

For emails or voicemails, please be sure to reference your name, course number/title, and class date/time so it is clear which course you are in. To facilitate responding to emails, please also include a
correct return email address in the message body or signature. Cell phone text messages and computer instant-messaging are not accepted by the instructor. (Receipt of emails or voicemails may not be verified.)

Please note that the instructor has provided office and personal telephone numbers and email addresses to facilitate communication. For personal communications, please email, call, or set an appointment to meet with the instructor. Also, please recognize that the instructor will talk about an issue directly relating to counseling or your experience as a student, but is not in a position to offer advice on general personal problems. To avoid dual relationships, the instructor cannot act as a personal counselor for students’ general problems and will recommend working with a mental health professional.

Though courtesy and thoughtful intentions are appreciated, please do not send forwarded jokes, chain letters, solicitations for donations, and similar SPAM-type emails to the instructor. Please only send emails directly relating to university business or the field of counseling.

X. Textbook(s)

The textbook(s) adopted for this course is/are:

Supplemental Texts

Also, required and supplemental reading selections—and general course information—will be provided by the instructor, with material provided during class sessions or electronic copies posted on Blackboard.

XI. Bibliography

Please refer to the reference lists and resources posted by the instructor in Blackboard.

The knowledge bases that support course content and procedures include:

XII. Grade Appeals
As stated in University Rule 13.02.99.C2, Student Grade Appeals, a student who believes that he or she has not been held to appropriate academic standards as outlined in the class syllabus, equitable evaluation procedures, or appropriate grading, may appeal the final grade given in the course. The burden of proof is upon the student to demonstrate the appropriateness of the appeal. A student with a complaint about a grade is encouraged to first discuss the matter with the instructor. For complete details, including the responsibilities of the parties involved in the process and the number of days allowed for completing the steps in the process, see University Rule 13.02.99.C2, Student Grade Appeals, and University Procedure 13.02.99.C2.01, Student Grade Appeal Procedures. These documents are accessible through the University Rules Web site at http://www.tamucc.edu/provost/university_rules/index.html. For assistance and/or guidance in the grade appeal process, students may contact the Office of Student Affairs.

XIII. Disabilities Accommodations
Please also refer to Class Policies regarding students requesting accommodations.
The Americans with Disabilities Act (ADA) is a federal anti-discrimination statute that provides comprehensive civil rights protection for persons with disabilities. Among other things, this legislation requires that all students with disabilities be guaranteed a learning environment that provides for reasonable accommodation of their disabilities. If you believe you have a disability requiring an accommodation, please call or visit Disability Services at (361) 825-5816 in Driftwood 101.

If you are a returning veteran and are experiencing cognitive and/or physical access issues in the classroom or on campus, please contact the Disability Services office for assistance at (361) 825-5816.
Group Project Rubric

- Analyze and Evaluate - not just summarize article
- Should be from a scholarly source/journal
- Select something you are interested in!

1. Analyze and interpret text. For example:
   a. What is the author’s/agency’s main point, goal, and purpose?
   b. Intended audience?
   c. Evidence and argument to support main points?
   d. Underlying assumptions or biases?

2. Evaluate your text/agency
   a. Evaluate the author’s ideas.
   b. Is the argument logical?
   c. Is the text well-organized, clear, and easy to read?
   d. Are the author's facts accurate? Is the author a credible source for the material?
   e. Have important terms been clearly defined.
   f. Do the arguments support the main point?
   g. Appropriate for the intended audience
   h. Does the text help you understand the subject?
   i. What questions or observations does this article suggest? What does the article make you think about?

Step 3. Plan and write your critique/power point

Write your critique in standard essay form - current APA format. It is generally best not to follow the author's organization when organizing your analysis, since this approach lends itself to summary rather than analysis. Begin with an introduction that defines the subject of your critique and your point of view. Defend your point of view by raising specific issues or aspects of the argument. Conclude your critique by summarizing your argument and re-emphasizing your opinion.

1. You will first need to identify and explain the author's/agency ideas. Include specific passages that support your description of the author's point of view.
2. Offer your own opinion. Explain what you think about the argument. Describe several points with which you agree or disagree. • For each of the points you mention, include specific passages from the text (you may summarize, quote, or paraphrase) that provide evidence for your point of view. • Explain how the passages support your opinion.
