Dissertation Research

Course Description

The course is designed to assist the students in writing a draft of the three-chapter (introduction, review of literature, methods) research proposal that may become the basis for a doctoral dissertation. Prerequisites: EDLD 6333, EDLD 6384, EDLD 6335, EDLD 6392.

Rationale

Students must be knowledgeable and competent in the methodology of educational research in order to complete a doctoral dissertation. This course provides the student with the opportunity to synthesize knowledge, understanding, and application of research design, instrumentation, sampling, and data analysis to write a research proposal that, if approved by the student’s dissertation committee, will become the basis for a doctoral dissertation.

Course Objectives/Learning Outcomes

This is the last of the five research methods and statistics courses in the Department of Educational Administration and Research. As such, the major objective of the course is to assist the student in writing and orally presenting the first draft of the doctoral dissertation proposal. Additionally, all students are expected to complete the appropriate Institutional Review Board (IRB) application form, which must be approved by TAMU-CC Committee for Research Involving Human Subjects in advance of the initiation of the research investigation.
