Statistics for Life MATH 1442.W01
Department of Mathematics and Statistics
Fall 2015

A. COURSE INFORMATION

Course number/section: CRN 62662/001
Class meeting time: Fully online, no meetings are scheduled
Class location: Online
Course Website: https://bb9.tamucc.edu/webapps/login/

B. INSTRUCTOR INFORMATION

Instructor: Dr. Jose H. Guardiola
Office location: CI-309
Office hours: TR 12:45-1:45 PM, 4:00-5:00 PM, F 9:00-10:00 AM
Telephone: (361) 825-5544
e-mail: jose.guardiola@tamucc.edu
Appointments: Please send me an email to make arrangements

C. COURSE DESCRIPTION

An introduction to statistical concepts and methods used in all disciplines to enhance decision making based on data analysis, including: basic experimental design models, measurement and data collection through sampling; display and summary of information, and assessment of relationship through descriptive techniques; probability concepts leading to estimation and hypothesis testing of means, variance and proportions, regression analysis, one-factor ANOVA and chi-square test of independence; and applications through case studies. The laboratory component of the course offers applications of the theory presented during the classroom sessions. Counts as the mathematics component of the University Core Curriculum.

This course prepares students for taking higher level courses in statistics and research and to understand the scientific literature in their field.

D. PREREQUISITES AND COREQUISITES

Prerequisites: MATH 0399 or placement beyond MATH 0399; also non-remedial status in Reading and Writing as determined by placement testing or THEA. Fall, Spring, Summer.

Corequisites: None

E. REQUIRED TEXTBOOK(S), READINGS AND SUPPLIES

Required textbook: Electronic version of the textbook, Elementary Statistics by Mario F. Triola, 12th edition, it is included in the MyLabsPlus system. For buying access to
Optional Textbook(s) or Other References
If you want a hard copy of the textbook (Elementary Statistics by Mario F. Triola), the current edition is the 12th, ISBN-10: 0321836960 | ISBN-13: 978-0321836960. Earlier editions will probably be just as helpful and hopefully cheaper as well. JMP software (JMP Pro®, Version 11.2.0, Copyright © 2013 SAS Institute Inc., Cary, NC) will be provided in the Lab and does not need be purchased unless you intend to work on labs at home.

Supplies
MyLabsPlus access kit is required for homework and quizzes. You will need to purchase an access code, either through the campus bookstore or directly from the publisher at the website. I recommend checking both sources before buying. I will discuss how you access and use MyLabsPlus during the first class meeting. An electronic version of the textbook is included inside the MyLabsPlus system. You need to install in your own computer the version of JMP provided for downloading in BlackBoard, if for some reason that is not possible you can use the computers located at computer labs at campus that have installed the JMP software.

F. STUDENT LEARNING OUTCOMES AND ASSESSMENT
Assessment is a process used by instructors to help improve learning. Assessment is essential for effective learning because it provides feedback to both students and instructors. A critical step in this process is making clear the course’s student learning outcomes that describe what students are expected to learn to be successful in the course. The student learning outcomes for this course are listed below. By collecting data and sharing it with students on how well they are accomplishing these learning outcomes students can more efficiently and effectively focus their learning efforts. This information can also help instructors identify challenging areas for students and adjust their teaching approach to facilitate learning.

By the end of this course, students should be able to:

1. Students will be able to use descriptive statistics and graphical exploration to summarize key features of data.
2. Students will be able to perform elementary probability calculations, primarily with the normal distribution and including applications of the Central Limit Theorem.
3. Students will be able to calculate confidence intervals and perform hypothesis tests of the following forms: one and two sample t-tests, Chi-square test, ANOVA, and linear regression.
4. Students will be able to determine an appropriate statistical analysis, given data and a research question.
5. Students will be able to interpret the results of all calculations and statistical tests in the context of the processes that generate that data, and will be able to express these interpretations clearly in writing.
6. Students will be able to use appropriate technology tools to perform needed calculations and tests.

G. INSTRUCTIONAL METHODS AND ACTIVITIES

Methods for instruction include the following:
• Students assume responsibility for their learning and ask questions to the instructor as needed.
• Participation in online discussions.
• Use of computer resources, including statistical software, spreadsheets, and the Internet for data location, data organization, and data analysis.

H. MAJOR COURSE REQUIREMENTS AND GRADING

Final course standing will be based upon homework, quizzes, two semester tests, lab section grade, and a final test each weighted as follows

<table>
<thead>
<tr>
<th>ACTIVITY</th>
<th>% of FINAL GRADE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Two semester exams</td>
<td>12.5 % each</td>
</tr>
<tr>
<td>Discussions</td>
<td>10%</td>
</tr>
<tr>
<td>Quizzes MyLabsPlus</td>
<td>10%</td>
</tr>
<tr>
<td>Homework MyLabsPlus</td>
<td>15%</td>
</tr>
<tr>
<td>Lab Section</td>
<td>15%</td>
</tr>
<tr>
<td>Proctored Final Exam</td>
<td>25%</td>
</tr>
</tbody>
</table>

I. COURSE CONTENT/SCHEDULE

<table>
<thead>
<tr>
<th>DATE (BY WEEK)</th>
<th>TOPIC</th>
<th>CHAPTER(S)</th>
<th>ASSIGNMENTS</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Introduction and graphing</td>
<td>Chapters 1 and 2</td>
<td>MLP and Labs</td>

</tr>
<tr>
<td>8</td>
<td>Hypothesis Testing</td>
<td>Chapter 8</td>
<td>MLP and Labs</td>
</tr>
</tbody>
</table>
Continued – Hypothesis testing | Chapter 8 | MLP and Labs
---|---|---
Two Samples Hypothesis Testing and Exam 2 during lab section | Chapter 9 and Review | MLP and Labs
Two samples Hypothesis Testing | Chapter 9 | MLP and Labs
Correlation and Regression | Chapter 10 | MLP and Labs
Contingency Tables | Chapter 11 | MLP and Labs
ANOVA | Chapter 12 | MLP and Labs
Final Exam taken in labs | NA | NA

Note: Changes in this course schedule may be necessary and will be announced to the class by the Instructor. The assignments and exams shown are directly related to the Student Learning Outcomes described in Section F.

J. COURSE POLICIES

**Participation in discussions**
Participation in discussions is considered equivalent to attendance in a regular face to face course. All students should submit an initial post and should respond to at least one classmate for each discussion topic. The content and level of participation should be adequate with good grammar and correctly written. It is expected that all students participate in discussion forums and a grade corresponding to the participation level will be assigned.

**Late Work and Make-up Exams**
MyLabsPlus homework and quizzes will have a 10% penalty after the due date. There will be no makeup for a missed exam. Please see section below regarding the exams policy.

**Exams Policy**
The lowest score of one of the two tests administered during the semester will be replaced by the score on the final test, provided that the final test score is better than one of the semester test scores. A missed test score will be replaced following the policy described above. The final test score will not be replaced by the semester test scores. The semester tests are administered online and are open book. The final exam will be proctored either online (some fees will apply) or it can be taken in campus at the time scheduled (to be determined). The final exam is not open book and you are allowed to bring two pages of notes for the final exam, written or typed on both sides on a sheet not larger than 8.5”x11”. Your name should be written at the top of the page in large and clear letters. Pages of notes and/or calculators cannot be shared. Cell phones cannot be used as calculators. No music devices are allowed during the examination. Scratch paper and formula sheets will be provided during the examination and should be returned to the instructor. No other webpages should be opened during a computer administered exam. If extra points are given, the total score should not exceed 100%. No points will
be “saved” toward the next examination.

K. COLLEGE AND UNIVERSITY POLICIES

- **Academic Integrity (University)**
  University students are expected to conduct themselves in accordance with the highest standards of academic honesty. Academic misconduct for which a student is subject to penalty includes all forms of cheating, such as illicit possession of examinations or examination materials, falsification, forgery, complicity or plagiarism. (Plagiarism is the presentation of the work of another as one’s own work.) In this class, academic misconduct or complicity in an act of academic misconduct on an assignment or test will result in a failing grade.

- **Classroom/Professional Behavior**
  Texas A&M University-Corpus Christi, as an academic community, requires that each individual respect the needs of others to study and learn in a peaceful atmosphere. Under Article III of the Student Code of Conduct, classroom behavior that interferes with either (a) the instructor’s ability to conduct the class or (b) the ability of other students to profit from the instructional program may be considered a breach of the peace and is subject to disciplinary sanction outlined in article VII of the Student Code of Conduct. Students engaging in unacceptable behavior may be instructed to leave the classroom. This prohibition applies to all instructional forums, including classrooms, electronic classrooms, labs, discussion groups, field trips, etc.

- **Statement of Civility**
  Texas A&M University-Corpus Christi has a diverse student population that represents the population of the state. Our goal is to provide you with a high quality educational experience that is free from repression. You are responsible for following the rules of the University, city, state and federal government. We expect that you will behave in a manner that is dignified, respectful and courteous to all people, regardless of sex, ethnic/racial origin, religious background, sexual orientation or disability. Behaviors that infringe on the rights of another individual will not be tolerated.

- **Deadline for Dropping a Course with a Grade of W (University)**
  The grade of W will be assigned to any student officially dropping a course. Please consult with the instructor before you decide to drop to be sure it is the best thing to do. Just stopping attendance and participation WILL NOT automatically result in your being dropped from the class. Should dropping the course be the best course of action, visit the Office of the University Registrar for the Course Drop Form that must submitted. No student is eligible to receive a W without completing the official drop process by this deadline. Please consult the Academic Calendar (http://www.tamucc.edu/academics/calendar/) for the last day to drop a course.

- **Grade Appeals (College of Science and Engineering)**
  As stated in University Procedure 13.02.99.C2.01, Student Grade Appeal Procedures, a
student who believes that he or she has not been held to appropriate academic standards as outlined in the class syllabus, equitable evaluation procedures, or appropriate grading, may appeal the final grade given in the course. The burden of proof is upon the student to demonstrate the appropriateness of the appeal. A student with a complaint about a grade is encouraged to first discuss the matter with the instructor. For complete details, including the responsibilities of the parties involved in the process and the number of days allowed for completing the steps in the process, see University Procedure 13.02.99.C2.01, Student Grade Appeal Procedures. These documents are accessible through the University Rules website at http://www.tamucc.edu/provost/university_rules/index.html, and the College of Science and Engineering Grade Appeals webpage at http://sci.tamucc.edu/students/GradeAppeal.html. For assistance and/or guidance in the grade appeal process, students may contact the chair or director of the appropriate department or school, the Office of the College of Science and Engineering Dean, or the Office of the Provost.

- **Disability Services**
  The Americans with Disabilities Act (ADA) is a federal anti-discrimination statute that provides comprehensive civil rights protection for persons with disabilities. Among other things, this legislation requires that all students with disabilities be guaranteed a learning environment that provides for reasonable accommodation of their disabilities. If you believe you have a disability requiring an accommodation, please call (361) 825-5816 or visit Disability Services in Corpus Christi Hall 116.

  If you are a returning veteran and are experiencing cognitive and/or physical access issues in the classroom or on campus, please contact the Disability Services office for assistance at (361) 825-5816.

  [http://disabilityservices.tamucc.edu/](http://disabilityservices.tamucc.edu/)

- **Statement of Academic Continuity**
  In the event of an unforeseen adverse event, such as a major hurricane and classes could not be held on the campus of Texas A&M University–Corpus Christi; this course would continue through the use of Blackboard and/or email. In addition, the syllabus and class activities may be modified to allow continuation of the course. Ideally, University facilities (i.e., emails, web sites, and Blackboard) will be operational within two days of the closing of the physical campus. However, students need to make certain that the course instructor has a primary and a secondary means of contacting each student.

L. **OTHER INFORMATION**

- **Academic Advising**
  The College of Science & Engineering requires that students meet with an Academic
Advisor as soon as they are ready to declare a major. The Academic Advisor will set up a degree plan, which must be signed by the student, a faculty mentor, and the department chair. Meetings are by appointment only; advisors do not take walk-ins. Please call or stop by the Advising Center to check availability and schedule an appointment. The College’s Academic Advising Center is located in Center for Instruction 350 or can be reached at (361) 825-3928.

**GENERAL DISCLAIMER**

I reserve the right to modify the information, schedule, assignments, deadlines, and course policies in this syllabus if and when necessary. I will announce such changes in a timely manner during regularly scheduled lecture periods.
