I. **Course Description (from catalog)**
The lab component explores the practical applications of the lessons being taught in the classroom. Students will participate as a team member through a variety of group exercises and tactical scenarios. The emphasis is on exploring, and developing skills in decision-making that the student will need in their advanced classes. The lab continues to build on developing knowledge of the leadership attributes and core leader competencies through the understanding of Army rank, structure, and duties as well as broadening knowledge of land navigation, individual, squad and platoon tactics.

II. **Rationale**
This course was designed to be student-centric with the onus of learning on the student, but facilitated by the instructor. Army Officers are expected to be life-long learners who take responsibility and personal initiative for their learning. You must properly conduct your pre-class assignments to gain an understanding of the foundation on each subject in the course. Doing so will allow your instructor to spend the majority of the class time on specific areas that are least understood from the lessons, rather than your instructor re-teaching the subject from scratch. Your instructor has a wealth of experience and knowledge to share in the classroom—do your homework so your instructor can spend more time sharing his personal knowledge and experiences with your class. Class will be conducted in an interactive manner with ample opportunities for small group discussions and practical exercises. Everyone will be responsible for contributing to the success of the learning experience.

III. **Course Objectives/Learning Outcomes**
