Texas A&M University - Corpus Christi
College of Nursing and Health Sciences

NURS 4322 TITLE
Syllabus
Summer 2017

FACULTY: Bruce Addison DO

OFFICE: 100% online course, off campus faculty

OFFICE HOURS: Daily Blackboard access several times a day.

EMAIL: bruce.addison@tamucc.edu

CREDITS: semester hours 3

COURSE DESCRIPTION: This course offers an exploration of selected pathophysiological processes that occur in the body when a homeostatic imbalance is brought about by internal or external factors. Knowledge of the etiology of specific impaired health states that individuals may experience, as well as the behavior and symptomatology that may be manifested will be explored. These principles will enable the student to frame problems through the critical thinking process.

COURSE OBJECTIVES: By the end of the course, the student will be able to:

1. Analyze the cause and effect relationships among multiple body systems in response to dysfunction.
2. Assess physiological responses to specific disease states.
3. Discuss risk factors to specific disease states.
4. Evaluate the compensatory mechanisms that are activated in response to dysfunction.
5. Describe the nurse’s collaborative role in monitoring for potential complications in individual human systems with selected health alterations.
6. Describe the nurse’s role in selecting therapeutic interventions.

REQUIRED TEXTS AND RESOURCES:

You do need a working reliable computer with reliable Internet service. Please take the introduction quiz to be sure that your computer will work with Blackboard. You will need a current version of Adobe Reader. It is available as a free download from http://www.adobe.com/products/reader/

You may use any PDF reader that you have access to. You will also need Word compatible software. If you do not have this, OpenOffice is a free download that will provide you with this function. It may be found at: http://www.openoffice.org/

Please submit all work in word.doc format.

**Essential Content:**

- Cellular function
  - Cellular and tissue characteristics
  - Cellular adaptation, injury, healing
  - Genetic control and inheritance
  - Genetic and congenital
  - Alteration in cell differentiation
- Body defenses
  - Immunity and inflammation
  - Mechanisms of infectious disease
  - Alterations in immune response
  - Acquired immunodeficiency syndrome
- Hematopoietic function
  - Blood cells and hematopoietic
  - Alterations in homeostasis
  - RBC and alterations in transport
  - Disorders of WBC and lymphoid tissue
- Cardiovascular function
  - Control of the circulation
  - Alterations in blood flow in the systemic circulation
  - Alterations in BP
  - Alterations in cardiac function
  - Heart failure and shock
  - Disorders of cardiac conduction and rhythm
- Respiratory function
  - Control of respiratory function
  - Alterations in respiratory function (RTI, neoplasms, and childhood disorders)
  - Alterations in ventilation and gas exchange
- Fluid, electrolytes, and acid-base balance
  - Control of fluid, electrolytes, and acid-base
  - Alterations in fluid and electrolytes
• Alterations in acid-base balance
• Urinary function
  • Control of urinary function
  • Alterations in urinary function
  • Renal failure
  • Alterations in urine elimination
• Reproductive function
  • Structure and function of the male reproductive system
  • Alterations in male genitourinary system
  • Structure and function of the female reproductive
  • Alterations of the female reproductive system
  • Sexually transmitted infections
• Gastrointestinal function
  • Control of GI function
  • Alterations in GI function
  • Alterations in liver, gallbladder, and pancreas
• Endocrine function
  • Mechanisms of endocrine control
  • Alterations in endocrine function
  • Diabetes mellitus
• Neural function
  • Organization and control of neural function
  • Disorders of brain function
  • Disorders of spinal cord function
  • Disorders of motor function
• Musculoskeletal function
  • Normal musculoskeletal function
  • Alterations in skeletal function
  • Alteration in muscle function
• Integumentary function
  • Control of integumentary function
  • Integumentary changes associated with aging
  • Alterations in skin function and integrity
• Sensory function
  • Special senses
  • Pain
  • Sensory changes associated with aging
  • Alterations in eye function
  • Alterations in ear function

Additional Policies
1. Students are expected to behave in a professional manner and are accountable for their behaviors.

2. Cell phones and beepers will be turned off or on “vibrate” during class and in exams for all classes that meet on Campus (not applicable to Blackboard courses online).

3. No children are allowed in class for all classes that meet on Campus (not applicable to Blackboard courses online).

4. Required reading should be completed before class. Assignments will be due at the beginning of the class period. For online Blackboard classes, the class week will be considered to start each week on the same day as the first day of scheduled postings online (Monday to Sunday if Monday is the first day of class, Wednesday to Tuesday if Wednesday is the first day of class, etc.).

5. Should a student miss a class, it is his/her responsibility to obtain handouts, lecture notes, and information from instructor or peers. There will be no automatic excused lack of participation for the class week for online Blackboard classes. For online Blackboard classes, you must meet your posting requirements each week. There is no make up work for online Blackboard classes.

6. Taping of lectures is permitted in this course.

7. Students must achieve a mean of 75% on major exams.

8. All exam dates are printed on the Topical Outline for classes that meet on Campus. For online classes exam dates are posted in the first day’s postings as well as the outline as mentioned.

9. Students with documented test-taking needs should discuss them with faculty prior to the first scheduled exam.

10. Students who are late for exams will not be given extra time. For online, Blackboard classes, you must finish the test in the time allotted. You must take the test on the day it is open or there will be no other time allowed to take the test and the score will be a zero.

11. No exam may leave the classroom; any student leaving the room with an exam will receive a zero for that exam. For online Blackboard classes do not discuss the test with your classmates. Sharing any information about a test or quiz is cheating and will be reported to the Judicial Affairs Committee.

12. Cheating is considered to have occurred if you share information about a test in verbal, written or printed format, online or in person. Taking the test must be an individual event. Do not take the test and allow others to see your responses.

13. Any student determined by the faculty to be cheating on an exam will receive a zero for that exam.

14. For classes that meet on campus, if a student is absent on the day of the exam:
   a. The student must notify the instructor prior to the start of the exam in order to have a make-up exam scheduled.
   b. The student must bring documentation to the instructor related to the absence as appropriate.
   c. The make-up exam may be multiple choice, essay, sentence completion, case study analysis, or any combination of these options at the discretion of the faculty. The student will not be notified regarding the format of the exam. The make-up
exam must be scheduled **within 5 working days** of the originally scheduled exam.

d. For Blackboard online classes, you must take the exam within the time it is posted. If you are unable to do so you must provide the instructor with documentation **prior to the start of the exam** why you are unable to take the exam.

e. For Blackboard online classes, you must make at least one original posting in that week’s discussion area. It should be within 48 hours of when the assignment is posted. It should be at least 75 words in length and be properly cited (APA format). You will be graded for content, format and appropriateness of your response. Each week your discussion points may accumulate to total number of points per week (please see the schedule below). Postings after midnight (CDT) on the last night of the class week will be considered late and will not be graded. Your first posting of the week must be within 48 hours of start of the course week or you will lose credit for that post. Plagiarism will result in a zero for that posting. The number of units open for discussion that week will determine the number of posts due each week. If there is only one unit open then 4 posts are required. If there are 2 units open then 2 posts for each unit is required for a total of 4 for the week.

**Dropping a Class**

I hope that you never find it necessary to drop this or any class. However, events can sometimes occur that make dropping a course necessary or wise. Please consult with me before you decide to drop to be sure it is the best thing to do. You may also want to discuss this course of action with your advisor. Should dropping the course be the best course of action, you must initiate the process to drop the course by going to the Student Services Center and filling out a course drop form. Just stopping attendance and participation WILL NOT automatically result in your being dropped from the class. Please see the academic calendar to determine the last day you may drop a class with an automatic grade of “W” this term.

**Course Evaluation:** In order to pass Nursing 4322, the student must achieve a minimum grade average of 75. Discussions must be completed each week and you cannot pass the course without participation in the weekly discussions. Points will be accumulated as follows:

- **Quizzes** – 25 points each total of 250 points possible (Must take quizzes or will fail due to lack of participation. This is an important part of the class).
- **Discussions** – 20 points each unit, total of 300 points possible.
- **EKG test** – 50 points total possible
First Major exam – 100 points possible
Second Major exam – 100 points possible
Third Major exam – 100 points possible
Final exam – 100 points possible

**Grading Scheme**

A = 89 and above (890 points and above)
B = 82 and above to less than 89 (820 and above to less than 89 points).
C = 74 and above to less than 82 (740 and above to less than 820 points).
D = 66 and above to less than 74 (660 points and above to less than 740 points).
F = less than 66 (less than 660 points).

All tests and quizzes are timed. The course week starts on Tuesday each week and the course opens on May 31st. Be prepared to start the class on that day. This course is 100% online and may be accessed through: [https://iol.tamucc.edu](https://iol.tamucc.edu) and click on Blackboard Login. **Please make arrangements to be available every Wednesday from 0900-2359 to take exams, they are not given at any other time.**

Students are allowed and encouraged to use any resource in their discussion postings as long as it is cited appropriately (APA format).

The exams are objective, multiple-choice, and true and false question format. The final will be cumulative, with previously untested material given heavier weight.

I will read each and every posting, interjecting ideas, questions or asking clarification. I am online every day and if you need to discuss anything about the course please email me in the Blackboard email. Do NOT send emails to me through the campus email, I may NOT check that mailbox for several days but I check Blackboard several times every day. Please contribute to the learner-centered environment with your discussion forum posts. Please participate in the discussion forums daily, remember that discussions after the last night of the class week, (midnight CDT) will not be included in your grade. You will lose points if you do not post each week. Expect to read a great deal. Your assignments contain essential information; please do NOT get behind in your reading. Interact, engage, and contribute to establishing and sustaining a
learner-centered environment. Expect to spend 15-20 hours per week on the course. Accept that successfully completing this program of study while challenging will open a myriad of doors for you professionally and personally.

Texas A&M Corpus Christi School of Nursing and Health Sciences believes discussion forums are an excellent way to pull online learning together. You are encouraged to post and respond regularly, the greater the participation, the greater the educational reward. You cannot pass this class without participation in the weekly discussion postings. Please expect to read a great number of posts per week and assist with meeting this expectation by quality participation.

All tests will be available only from 0900 to 2359 each Wednesday. Please check course announcements on each Tuesday to check for any changes to the schedule.

An online test proctoring service may be utilized. If so additional fees will be required from the student in order to take the exams. Please see the course announcements on the first day of class. It is the student’s responsibility to make arrangements to pay these fees as required for each exam. If this service is to be used an announcement will be made before the first exam.

**POLICIES:**

**Evaluation Input From Students**

The faculty of the College of Nursing and Health Sciences places great value on evaluative input from students. Evaluation of courses, instructors and clinical facilities provides the College with important data which is used to strengthen the program. Data is analyzed as to trends and themes and is important to curriculum and sequencing decisions. All evaluations for courses posted are online. The online mechanism allows us the opportunity to tabulate and store information in order to analyze trends within the curriculum. Please be assured that this information is secured and not released until after grades are submitted. No names are available to faculty. In order to garner some reliability and validity, the College must have representative data from the student population. That representation, based on the literature, has been set at 70%. The College is
anticipating that students will thoughtfully participate in the evaluation process which will assist the faculty with the growth of the program. A link to evaluations will be available on Blackboard toward the end of the semester. Thank you in advance for your assistance with the evaluation process.

**Academic Integrity and Honesty**

It is expected that University students will demonstrate a high level of maturity, self-direction, and ability to manage their own affairs. Students are viewed as individuals who possess the qualities of worth, dignity, and the capacity for self-direction in personal behavior. University students are expected to conduct themselves in accordance with the highest standards of academic honesty. Academic misconduct for which a student is subject to a penalty includes all forms of cheating, such as illicit possession of examinations or examination materials, forgery, or plagiarism. (Plagiarism is intentionally, knowingly, or carelessly presenting the work of another as one’s own). Please see the following sites for additional information:

- University Student Handbook and Code of Conduct: [http://www.tamucc.edu/~students](http://www.tamucc.edu/~students)
- University catalog related to academic integrity and honesty: [http://catalog.tamucc.edu/](http://catalog.tamucc.edu/)

**Students with Disabilities**

The Americans with Disabilities Act (ADA) is a federal anti-discrimination statute that provides comprehensive civil rights protection for persons with disabilities. Among other things, this legislation requires that all students with disabilities be guaranteed a learning environment that provides for reasonable accommodation of their disabilities. If you believe you have a disability requiring an accommodation, please contact the Disability Services Office at 361.825.5816 or visit the office in CCH 116. If you are a returning veteran and are experiencing cognitive and/or physical access issues in the classroom or on campus, please contact the Disabilities Services office for assistance at (361) 825-5816.

**Title IX**

As part of the Texas A & M Corpus Christi University policy, pregnant students are urged to contact the Title IX office for facilitation of academic issues impacted by pregnancy, delivery and subsequent complications. Contact information: Mr. Samuel Ramirez, Title IX Coordinator or Ms. Rosie Ruiz, Deputy Title IX Coordinator (825-5826).

**Military Students**
Active duty military personnel, military spouses, and veterans with special circumstances (eg.: deployment, drill requirements, disabilities) are welcome and encouraged to communicate these, in advance if possible, to the course and clinical instructor.

Grade Appeals Process

The College of Nursing and Health Sciences (CONHS) adheres to the University’s student grade appeal procedures described in Section 13.02.99.C2.01 (revised May, 2013) and follows those guidelines. See [http://academicaffairs.tamucc.edu/Rules_Procedures/](http://academicaffairs.tamucc.edu/Rules_Procedures/) for the University procedure and see [http://conhs.tamucc.edu/shb/](http://conhs.tamucc.edu/shb/) for the CONHS process identified in the Student Handbook.

Support Services

Students are encouraged to seek faculty assistance in accessing University Services, including tutoring, health services, personal counseling, degree counseling, financial aid, learning resources, job/work placement, career guidance, and computer/technical support/instruction. If a student is interested in other support services provided by the University, the student is encouraged by the College of Nursing and Health Sciences and the University to seek these services.
