PHIL 2303.003: Introduction to Logic  
Fall 2016  
Time: TR 3:30-4:45  
Location: CI-126

**Instructor:** Ana-Maria Andrei, PhD
**Office:** TBA
**Office Hours:** TBA and by appointment
**Phone:** TBA
**Email:** ana.andrei@tamucc.edu (preferred)

**Course Description**
The course introduces you to some basic concepts and methods employed to analyze and evaluate arguments. We will look at several logical systems (e.g., syllogistic logic, propositional logic and predicate logic), and will examine their relative strengths and weaknesses. We will practice employing these formal tools to identify, analyze and evaluate a wide variety of arguments. Although time constraints will not allow us to focus explicitly on standardized tests such as the LSAT, GMAT or GRE, the skills acquired by studying logic help candidates get good scores on such tests. More generally, developing one’s ability to think logically is a precondition of success in most domains of inquiry, as well as in everyday communication.

**Student Learning Outcomes**
Upon completion of the course, you should be able to:
- define central logical terms such as *argument, validity, soundness, induction, deduction, fallacy,* etc.
- translate natural language sentences into the relevant formal language
- test the validity of arguments using the techniques required by the relevant logical system (e.g., Venn diagram, truth tables, proofs, etc.)
- be able to apply the logical tools introduced in the course to analyze and evaluate arguments from everyday sources

**Required Texts**

**Course Requirements**
- in-class and homework assignments;
- four quizzes on the following dates: 09/13, 09/27, 11/08, 12/01 (quizzes typically include true/false and multiple choice questions, as well as various kinds of problems pertaining to the relevant chapters; the lowest quiz score will be dropped);
- two exams (the exams contain the same kinds of exercises as the quizzes, but are longer and cover more material).

**Grading Policy**
Grade breakdown:
- midterm: 30%
- final: 30%
- quizzes: 30%
- in-class and homework assignments: 10%

Final letter grades will be assigned based on the following percentages:
- Over 90% = A
- 80 – 89% = B
- 70 – 79% = C
60 – 69% = D
Below 60 = F

**Attendance and late work policy**
Missing more than 4 classes will negatively impact your final grade. No late work will be accepted, unless due to extreme circumstances.

**Classroom etiquette**
Students are expected to come to class on time and switch off cell phones before entering the classroom. Please do not read newspapers, use your laptop or phone in a disruptive fashion, sleep or distract your fellow students in any other way. You should be attentive, take notes, participate in classroom activities as required and be courteous to your classmates and the instructor. No recording of any kind is permitted in this course unless recommended by the Disability Resource Center.

**Plagiarism**
Plagiarism is the presentation of work as one’s own that was in fact produced by another author (e.g., the submission of a paper as one’s own work, when it was written by someone else, or the submission of a portion of a paper written by another author, without citing the source of the material). University policy strictly prohibits plagiarism. Plagiarized work will be assigned a grade of “F.”

**Academic advising**
The College of Liberal Arts requires that students meet with an Academic Advisor as soon as they are ready to declare a major. Degree plans are prepared in the CLA Academic Advising Center. The University uses an online Degree Audit system. Any amendment must be approved by the Department Chair and the Office of the Dean. All courses and requirements specified in the final degree plan audit must be completed before a degree will be granted. The CLA Academic Advising Office is located in Driftwood #203. For more information please call 361-825-3466, or log onto http://www.tamucc.edu/~aac.

**Disability services**
The Americans with Disabilities Act (ADA) is a federal anti-discrimination statute that provides comprehensive civil rights protection for persons with disabilities. Among other things, this legislation requires that all students with disabilities be guaranteed a learning environment that provides for reasonable accommodation of their disabilities. If you believe you have a disability requiring an accommodation, please call or visit Disability Services at (361) 825-5816 in Corpus Christi Hall, Room #116.
If you are a returning veteran and are experiencing cognitive and/or physical access issues in the classroom or on campus, please contact the Disability Services office for assistance at (361) 825-5816.

**Grade appeal process**
Students who feel that they have not been held to appropriate academic standards as outlined in this class syllabus, equitable evaluation procedures, or appropriate grading, may appeal the final grade given in the course. A student with a complaint about a grade is encouraged to first discuss the matter with the instructor. For complete details on the process of submitting a formal grade appeal, please visit the College of Liberal Arts website, cla.tamucc.edu/students/studentinfo.html. For assistance and/or guidance in the grade appeal process, students may contact the Associate Dean.
Course Schedule

This is a tentative schedule. For your benefit, we will be flexible about what topics we discuss, exactly, and when. It is your responsibility to stay up to date with schedule revisions.

Week 1 (08/25) Introduction
Week 2 (08/30, 09/01) Basic concepts (chapter 1)
  - Recognizing arguments
  - Validity and soundness
Week 3 (09/06, 09/08)
  - Validity and soundness
  - Proving invalidity
Week 4 (09/13, 09/15) Fallacies (chapter 3)
  - Types of fallacies
Week 5 (09/20, 09/22) Fallacies (chapter 3), cont’d; Categorical propositions (chapter 4)
  - Fallacies in ordinary language
  - Types of categorical propositions; Venn diagrams
Week 6 (09/27, 09/29) Categorical Syllogisms (chapter 5)
  - Syllogisms: standard form, mood and figure
  - Translation exercises
Week 7 (10/04, 10/06) Categorical Syllogisms (chapter 5), cont’d
  - Venn diagrams for syllogisms
  - Rules and fallacies
Week 8 (10/11, 10/13)
  - Review Session
  - Midterm exam
Week 9 (10/18, 10/20) Propositional logic (chapter 6)
  - Truth functions
  - Translation exercises
Week 10 (10/25, 10/27) Propositional logic (chapter 6), cont’d
  - Truth tables
  - Argument forms and fallacies
Week 11 (11/01, 11/03) Natural deduction (chapter 7)
  - Rules of implication I
  - Proofs using the first four rules of implication
Week 12 (11/08, 11/10) Natural deduction (chapter 7), cont’d
  - Rules of implication II
  - Proofs using all rules of implication
Week 13 (11/15, 11/17) Predicate logic (chapter 8)
  - Predicate logic: symbols
  - Translation exercises
Week 14 (11/22) Predicate logic (chapter 8), cont’d
  - Rules of inference
  - Proofs in predicate logic
Week 15 (11/29, 12/01) Induction
  - Analogy and legal and moral reasoning (chapter 9)
Week 16 (12/06) Final Review

[The final exam will be held on the assigned date.]
