Course Description:
Students learn basic skills and techniques for drawing from direct observation using subjects such as still life, landscape and architecture. The description of form, light and special depth is emphasized along with accurate proportion and scale. Research tools such as thumbnail sketches, quick studies and sketchbooks are used to develop ideas. Analysis of drawings, critiques and classroom discussions build vocabulary and enrich the students’ understanding of drawing.

Course Goals:
The purpose of this course is to provide each student with specific drawing media experiences and to build basic perceptual skills and drawing techniques from direct observation. Principle goals include an introduction to the elements of art: line, value, shape/volume and texture. The depiction of form, light and special depth is emphasized along with accurate proportion and scale. Writing, critiques, and applications of art history will broaden the understanding of drawing as a visual language.

Student Learning Outcomes:
- Ability to draw from direct observation
- Successfully use line, value and linear perspective to depict form and space
- Students will demonstrate competence with limited black and white media
- Students will demonstrate professional presentation skills and craftsmanship
- Students will integrate appropriate terminology in the analysis and critique of drawings

Professional Goals:
- Students will demonstrate the ability to write a statement pertaining to their work
- Students will present their work in a professional manner
- Students will demonstrate the ability to research historical and contemporary examples in their field
Textbook:
In lieu of a textbook, students will be given handouts. Keep these handouts in a folder and bring them to every class.

Participation in Critiques, Late Work Policy and Expectation
Critiques are an essential part of the creative process. Students should be open to hearing feedback about the quality of their work on an ongoing basis throughout the semester. When receiving criticism, listen with an open mind. The value of being in school, and in a small studio class, is not only to give and receive as much feedback as possible, but to learn how to make the most of it.

Students are expected to work a minimum of three hours a week outside of class on drawing, this is the only way to improve and master the skills.

You must be present on the day of critique. Projects one class period late: 10 point deduction, two class periods late: 20 point deduction. After that you will receive a ZERO.

Lockers:
See Art Office to reserve a locker in the hallway.

Academic Integrity/Plagiarism.
University students are expected to conduct themselves in accordance with the highest standards of academic honesty. Academic misconduct for which a student is subject to penalty includes all forms of cheating, such as illicit possession of examinations or examination materials, falsification, forgery, complicity or plagiarism. (Plagiarism is the presentation of the work of another as one’s own work.) In this class, academic misconduct or complicity in an act of academic misconduct on an assignment or test will result in removal from class.
