I. Course Description

A course emphasizing the finding, interpreting, and use of research to achieve a stated educational goal for each individual student. Concepts of tests and measurements are emphasized for interpreting research results and gathering data for applied research. Students will develop and execute an applied inquiry project. **Prerequisites:** EDUC 5351, 5352, 5353, 5354, 5355, 5356, 5357.

II. Conceptual Framework

In this course, we will discuss the research process within a larger context of problem-solving. The framework for the course stipulates that there is not a single method for research, but rather techniques that work better for a particular situation. The overall intention is for you to become more of an expert in the research process, and to develop into a critical consumer of educational research. Gaining knowledge of the research process, while working in concert with tools and skills determined necessary for a given framework in a particular context, will enable you to develop your skills as an informed researcher. The concepts, practices, and hands-on experience related to educational research in this course are considered within a context of applied research. This context is organized into two major areas: First, learning the fundamentals; establishing a framework, exploring the literature, and learning about research methodologies; Second, exploring and applying the research; identifying, collecting and interpreting data, then summarizing, synthesizing, and applying the results. We will explore different aspects of the research experience during the semester as we uncover the components of the applied research process related to your individual inquiry projects and data collection.
III. Required Textbook

Recommended Textbooks
The following recommended textbooks are intended to be selected based on your research methodology preferences in *Week 4* of the course. Before purchasing, consider your paradigmatic stance, and the accepted methodologies within your field of study.

IV. Academic Honesty

1. Texas A&M University-Corpus Christi students are expected to conduct themselves in accordance with the highest standards of academic honesty.
2. Academic misconduct for which a student is subject to penalty includes all forms of cheating, such as illicit possession of examinations or examination materials, forgery, or plagiarism.
3. Students are responsible for adhering to Texas A&M University-Corpus Christi’s culture of academic honesty. Therefore, all individual submissions must be created independently and plagiarism or cheating will result in a failing grade.
4. More detailed information about academic honesty is located in the student catalogue:
   [Academic Integrity](#)

Spring, 2018
David R. Squires, Ph.D.
Texas A&M University-Corpus Christi
V. Goals and Objectives

During the course, each student will be expected to:

1. **Explore** how to apply research in a variety of contexts to meet multiple purposes.
   - a) Critically examine real world research
   - b) Critique a variety of educational research studies that use various methods (quantitative, qualitative, and mixed methods)
   - c) Demonstrate understanding of research terminology

2. **Reflect** upon literature relevant to a scholarly theme.
   - a) Review the existing research literature on a specific topic
   - b) Identify and write a researchable question
   - c) Annotate, synthesize, and review a group of published articles

3. **Compose** a proposal for a research project with a purpose and design informed by applied research, literature, and data collection.
   - a) Apply research findings from a literature review to an educational problem
   - b) Complete the Online Collaborative Institutional Training Initiative (CITI) Training
   - c) Collect data systematically on a topic of your choice (either quantitative, qualitative or mixed methodologies)

4. **Disseminate** the results of an original scholarly work.
   - a) Interpret and present data results
   - a) Locate, gather, and synthesize information relevant to an original research project
   - b) Compose a draft manuscript according to the APA style guide

5. **Critique** a scholarly work.
   - a) Review the compositions of your peers
   - b) Provide constructive feedback
   - c) Offer normative suggestions for improvement

*Spring, 2018*

David R. Squires, Ph.D.
*Texas A&M University-Corpus Christi*
VI. Course Requirements

The course requirements provide opportunities for students to explore the concepts, theories and practices related to applied research, and developing professionally written research based scholarly articles. Grades are awarded based on points earned for each assignment. The due dates for assignments are indicated on the course calendar. Assignments may be submitted prior to the due date, however, assignments submitted late will be penalized 20% for each day late. Assignments completed on time may be resubmitted for an improved grade up to one week after the original due date, (excluding your final paper unless you submit your assignment a week before the due date). Assignments submitted on time may be resubmitted only once. Additional information about assignments is located in the course Learning Management System site Blackboard Learn.

VII. Online Access

This course is offered completely online asynchronously and the use of Blackboard Learn is required. A variety of asynchronous technologies will be used to teach this class. You will need a computer capable of accessing the internet for this course. Also, some featured course module content may require Adobe Flash Player. All assignments and graded course content are posted in the Blackboard LMS site. Rubrics for each assignment and requirements are found within each Blackboard weekly module. We will primarily meet asynchronously for this course, unless otherwise announced. If you cannot attend an announced synchronous meeting via WebEx Training, if or when one is scheduled, the session will be recorded for you to review at a later date. If you haven't already prepared your computer for Blackboard, access Blackboard Technical Requirements and follow the directions. Blackboard has a notification system that sends an alert when certain events happen in your course. You can choose which alerts you want to receive and how you want to receive them. Workshop schedules on how to use Blackboard tools are available at https://iol.tamucc.edu/.

For Technical Assistance Contact the IT Help Desk
Phone: (361) 825-2692 (local); (866) 353-2491 (toll free)
Email: ithelp@tamucc.edu

Spring, 2018
David R. Squires, Ph.D.
Texas A&M University-Corpus Christi
VIII. Online Participation [10 Points]

You are expected to access your Blackboard Learn course site on a regular basis and participate every week by posting peer review feedback, commenting, asking questions, and engaging fully in the class discussion forum. By the second week of the course you need to select a peer reviewer from among your classmates and email me your review teams. In many settings, educational research is a team effort. This requires an understanding of group dynamics and interpersonal communication. Furthermore, meeting asynchronously is not an excuse for being unprepared for class assignments. We will read a number of relevant articles and chapters, and have discussions regarding the readings posted on the discussion forum. Since we do not meet face to face, you must also plan your schedule carefully, practice self directed learning strategies, engage in active online participation, and manage your time accordingly. You are encouraged to engage and collaborate with your peers via web conferencing tools, and in person. Many educators and learning experts contend that our current system of education does not encourage, teach, or in some cases even tolerate questions: This is not the case in this course. Inquiry is a powerful tool, and questioning is an important skill for you to cultivate. To perform well in this course, you must plan on taking advantage of the help seeking opportunities provided.

IX. Research Design Activities [20 Points]

Research Design Activities (RDAs) are designed to enhance, extend, and support course content. These are completed individually and are meant to give you some initial research practice. Feedback will be provided first by a research peer review partner (selected no later than the second week of the class), then the instructor. You can revise these based on your peer reviewer’s feedback, at which time the instructor will evaluate them. These activities are meant to be "low stress," so if you find yourself sweating over them, you are missing the point. The purpose of each RDA is to give you some quick, initial practice applying the respective research skill. If you do not complete a specific RDA appropriately, you will have one opportunity to resubmit based on the instructor feedback. Though you are under no obligation to do so, it is perfectly acceptable to refine your RDAs to make them part of the Research Project due at the end of the course. It is therefore wise to identify your project topic early on in order for you to use the RDAs as the first step in your research project. A total of two RDAs are planned based on the following topics:

1. Identifying a Research Problem and Writing a Researchable Question
2. Conducting a Literature Review

Spring, 2018
David R. Squires, Ph.D.
Texas A&M University-Corpus Christi
X. Systematic Data Collection [25 Points]

The purpose of the systematic data collection assignment is to reflect on the role and value of research data to inform one's thinking or decision-making in practice. This assignment is intended for you to gain some experience of what it feels like to actually do research on a topic of personal interest to you. Your task is to identify a subject or topic on which you have genuine curiosity, and then systematically collect data. We will cover a variety of methods including quantitative approaches to collecting descriptive statistics, participant surveys, data analytics and representing and interpreting said data. We will also cover multiple qualitative approaches to data collection including analysis including, observations, in depth field notes, interviews, focus-groups to name a few. Students will also be provided with optional readings for qualitative ethnographic studies, and discourse analysis. Furthermore, we will explore mixed method data collection, combining both qualitative and quantitative approaches, how to develop mixed methods studies and the complementarity, triangulation, and research expansion mixed methods offers as a methodological approach.

Special Note on Mixed Methods
Mixed methods often requires much more upfront work to be accomplished efficiently; because, you are essentially combining two methodologies, or two independent studies, and merging them together into one completed research study. While this approach can be more labor intensive, it is also often more rewarding as well, and provides insights from multiple data points where qualitative or qualitative data alone did not elucidate or triangulate a given research phenomena. When multiple methods are combined fully and effectively, a mixed methods approach can expand and complement a given research project. However, it should be noted that more methods may not always be better or even necessary to your inquiry project. Together we will carefully consider methodological integration for your individual projects and what effective research design looks like.

Completion of CITI Training
You will register and complete the online Collaborative Institutional Training Initiative (CITI) Training, a requirement for researchers conducting human research. You will also complete the student project form and participant consent form. All of the forms and links are provided for you within the course LMS site.
Class-Approved IRB
If you are collecting data to fulfill coursework as part of a class project, you need to receive my approval prior to conducting your data collection. To receive my approval, you need to complete and provide the following:

- Cover sheet methodology form
- Data collection project description form
- Consent form you will use with your participants

University-Level IRB
If you have an active IRB at the University level that includes data collection, you may work on your own research project for this assignment. I will need a copy of the IRB and an e-mail from your supervising instructor(s) providing authorization for you to use the data for the data collection project.

**If you want to publish or share your research at a conference, you MUST have a completed IRB application and approval at the University level. If you do your research project as a class project, you CANNOT publish or share your research at conferences. Furthermore, your coursework research should meet the following requirements:**

a. **NO MINORS:** The project cannot include minors or any other vulnerable populations like pregnant women, prisoners, those who lack the capacity to consent, non-English speaking individuals, and such.

b. **NO MORE THAN MINIMAL RISK:** Minimal risk: is the probability and magnitude of harm that is normally encountered in the daily lives of healthy individuals. This also precludes the study of any illegal activities.

c. **NO DECEPTION:** The project cannot include any deception. Individuals must be fully informed and given the opportunity to voluntarily consent to participation.

d. **NO PUBLICATION:** Data from student projects approved under this fast track review category cannot be used for publication or for thesis/dissertation research.

e. **NO VIDEOTAPE:** Audio taping is allowed if the recording is erased upon transcription or no later than the end of the semester.

Spring, 2018
David R. Squires, Ph.D.
Texas A&M University-Corpus Christi
XI. Research Project [40 Points]

This is the main deliverable for the course, a complete 10 - 15 page research manuscript. The assignment should be completed in five sections:

1. Introduction to the research topic and at least one research question (no more than three)
2. Review of the relevant literature
3. Target research methodology proposal and data collection strategy
4. Presentation of the results of data collection and data analysis
5. Self reflection on the research process including a discussion of your results and how the results informed, or did not inform, your original research question(s)

You will also include your full works cited page, and any appendices if necessary. It is required that you present an overview of your research in a pre-recorded presentation that will be made available to all participants in the course no later than Wednesday, December 6th. Tools and strategies for accomplishing this are available in the Blackboard Learn course site.

XII. Peer Review Critiques [5 Points]

The purpose of the peer review critique of the research presentation is to watch and provide a brief critique of a subset of the presentations made by your classmates. One of the benefits of this course is that participants tend to address very important and timely research topics in their final projects, resulting in an opportunity for the rest of us to learn a great deal. The requirements that all presentations be short and pre-recorded allows us to use our time flexibly and strategically to enjoy this benefit. Rather than be required to listen to every project presentation, each participant will instead be required to watch a subset that best matches their interests. All participants must choose to watch at least 3 presentations of other classmate's research design projects, and write and submit a brief critique of each (approximately 100 words for each critique) addressing the following points: 1.) One-sentence summary of the topic; 2.) importance of the topic; 3.) strengths and weaknesses of the project; and 4.) persuasiveness of the presentation. Details on how and where to submit these critiques are located in the Blackboard course site. All peer critiques are due no later than Wednesday, December 6th (before the last day of class).

Spring, 2018
David R. Squires, Ph.D.
Texas A&M University-Corpus Christi
XIII. Academic Research & Writing

Utilize the Mary and Jeff Bell Library Resources

→ Search for research articles through: https://portal.tamucc.edu/
→ Utilize the Enhanced Search features, or optionally use the Subject-Specific Database to Search for Articles on a Topic: https://tamucc.libguides.com/findarticles
→ Alternatively, utilize the TAMUCC Google Scholar link to find articles and access to full texts

Scholarly Citations APA Style

The Publication Manual of the American Psychological Association, Sixth Edition, is the required style for all academic citations in this course: http://www.apastyle.org/index.aspx. If you are unsure about particular APA formatting and citation rules, refer to your required course textbook Beins, Chapter 8.

Submitting Assignments

Please save your assignments as Word documents that include your name in the file name. For example, “YourLastName_LiteratureReview.doc”. Completed assignments should be submitted as Word documents. I will then insert comments and feedback electronically then return it to you via email. Again, please include your name in the file name and please do not submit your work as a PDF. You should see comments inserted throughout your paper when it is returned. If you can’t see these comments, please let me know. More details on each assignment are provided in the Blackboard Learn site. Please download and read these assignment rubric descriptions carefully.

XV. Additional Resources

The Writing Center
The ability to write in an appropriate academic manner is critical to successful graduate study and to research in particular. Students who need editorial assistance are encouraged to make such arrangements. A good place to start is the Center for Academic Student Achievement (CASA) Writing Center:
http://casa.tamucc.edu/wc.php

Classroom/Professional Behavior
All students are expected to act in a responsible manner with consideration of fellow students and toward TAMUCC faculty and staff members. Specific rules and information is available in the TAMUCC Student Handbook.

Statement of Academic Continuity
In the event of a campus evacuation due to inclement weather this course will still be available online. If you have access to the Internet, you will be able to continue your coursework, check your grades, interact with your classmates and post assignments online.

Disability Services
It is the policy of Texas A&M University-Corpus Christi to make reasonable accommodations for qualified individuals with disabilities. I am committed to doing whatever is necessary to make this learning experience as fulfilling as possible for everyone taking this course. Please take time to discuss any concerns with me early in the semester so we can work together to make the necessary accommodations for you. Please know that anything you discuss with me in this regard will be held in strictest confidence. You must be registered with Disability Services to receive academic accommodations. Please visit http://disabilityservices.tamucc.edu/ for more information. Or call Disability Services at (361) 825-5816 Monday - Friday and visit CCH 116 to schedule an appointment.

A Note Regarding Incomplete (I) grades
My policy is not to give a grade of "I" (incomplete), except in the rare case of a medical emergency.

Spring, 2018

Goodall, H. L. (2000). *Writing the new ethnography*. Walnut Creek: Altamira Press. (pp. 106-107)

*Spring, 2018*

David R. Squires, Ph.D.
Texas A&M University-Corpus Christi
XIX. Bibliography

*Required Course Policies*

University students are expected to conduct themselves in accordance with the highest standards of academic honesty. Academic misconduct for which a student is subject to penalty includes all forms of cheating, such as illicit possession of examinations or examination materials, falsification, forgery, complicity or plagiarism. (Plagiarism is the presentation of the work of another as one’s own work.) In this class, academic misconduct or complicity in an act of academic misconduct on an assignment or test will result in a failing grade.

*Dropping a Class*

I hope that you never find it necessary to drop this or any other class. However, events can sometimes occur that make dropping a course necessary or wise. Please consult with me before you decide to drop to be sure it is the best thing to do. Should dropping the course be the best course of action, you must initiate the process to drop the course by going to the Student Services Center and filling out a course drop form. Just stopping attendance and participation WILL NOT automatically result in your being dropped from the class. (April 6th, 2018) is the last day to drop a class with an automatic grade of “W” this term.

*Classroom/professional behavior*

Texas A&M University-Corpus Christi has a diverse student population that represents the population of the state. Our goal is to provide you with a high quality educational experience that is free from
repression. You are responsible for following the rules of the University, city, state and federal
government. We expect that you will behave in a manner that is dignified, respectful and courteous to all
people, regardless of sex, ethnic/racial origin, religious background, sexual orientation or disability.
Behaviors that infringe on the rights of another individual will not be tolerated.

Grade Appeals*

As stated in University Procedure 13.02.99.C2.01, Student Grade Appeal Procedures, a student who
believes that he or she has not been held to appropriate academic standards as outlined in the class
syllabus, equitable evaluation procedures, or appropriate grading, may appeal the final grade given in the
course. The burden of proof is upon the student to demonstrate the appropriateness of the appeal. A
student with a complaint about a grade is encouraged to first discuss the matter with the instructor. For
complete details, including the responsibilities of the parties involved in the process and the number of
days allowed for completing the steps in the process, see University Procedure 13.02.99.C2.01, Student
Grade Appeal Procedures. These documents are accessible through the University Rules Web site at
http://www.tamucc.edu/provost/university_rules/index.html. For assistance and/or guidance in the grade
appeal process, students may contact the Dean’s office in the college in which the course is taught or the
Office of the Provost.

Disabilities Accommodations*

The Americans with Disabilities Act (ADA) is a federal anti-discrimination statute that provides
comprehensive civil rights protection for persons with disabilities. Among other things, this legislation
requires that all students with disabilities be guaranteed a learning environment that provides for reasonable accommodation of their disabilities. If you believe you have a disability requiring an accommodation, please call or visit Disability Services at (361) 825-5816 in Corpus Christi Hall 116. If you are a returning veteran and are experiencing cognitive and/or physical access issues in the classroom or on campus, please contact the Disability Services office for assistance at (361) 825-5816.

Statement of Academic Continuity

In the event of an unforeseen adverse event, such as a major hurricane and classes could not be held on the campus of Texas A&M University–Corpus Christi; this course would continue through the use of Blackboard and/or email. In addition, the syllabus and class activities may be modified to allow continuation of the course. Ideally, University facilities (i.e., emails, web sites, and Blackboard) will be operational within two days of the closing of the physical campus. However, students need to make certain that the course instructor has a primary and a secondary means of contacting each student.
