A. COURSE INFORMATION

Course number/section: PHYS 3331
Class meeting time: MWF 11:00AM-11:50AM
Class location: CCH 249, TTVN Video Classroom
Course Websites: [http://wtclass.wtamu.edu/](http://wtclass.wtamu.edu/)

B. INSTRUCTOR INFORMATION

Instructor: Dr. Jacqueline M Dunn
Office location: Midwestern State University, McCoy Engineering Hall 219D
Office hours: TBD
Telephone: (940) 397-4184 (office)
E-mail: jackie.dunn@mwsu.edu
Appointments: Appointments outside of the office hours should be scheduled via email

Course Facilitator: Dr. Barbara Szczerbinska
Office location: NRC 3503
Office hours: Tuesday 8:15AM-9:15AM, 2PM-3PM
                       Wednesday 9AM-11AM
                       Thursday 8:15AM-9:15AM, 2PM-3PM
Telephone: (361) 825-3916
E-mail: Barbara.Szczerbinska@tamucc.edu
Appointments: Appointments outside of the office hours should be scheduled via email

C. COURSE DESCRIPTION

Catalog Course Description
Fundamentals of classical mechanics. Topics include particle dynamics in one, two and three dimensions: conservation laws; dynamics of a system of particles; motion of rigid bodies; central force problems; accelerating coordinate systems; Newton’s theory of gravitation; Lagrange’s and Hamilton’s formulations of classical mechanics.

Extended Course Description
This course is being offered by the Texas Physics Consortium as part of the Joint BS degree with a Physics Major. All TPC courses use the WTClass system for class management (instead of Blackboard). For more information on TPC, please visit our website (http://www.tarleton.edu/tpc/) or speak with the Local Facilitator.

The Course Syllabus from the sending institution will be provided for students and will be the primary Syllabus that the instructor will follow. This Syllabus exists to make sure you have all of the information summarized in one place and that you are informed about TAMUCC policies.
D. **PREREQUISITES AND COREQUISITES**

**Prerequisites:**
PHYS-2426, University Physics II

**Co-requisites:**
MATH-3315, Differential Equations

E. **REQUIRED TEXTBOOK, READINGS AND SUPPLIES**

**Required Textbook(s)**
Analytical Mechanics 7th Ed. by Fowels and Cassidy
Cengage Learning
ISBN:978-0534494926

**Supplies:**
- Internet access is vital for interacting with the instructor and the local facilitator.
- Access to a scanner may be required to submit homework assignments. The Local Facilitator can help with this.

F. **STUDENT LEARNING OUTCOMES AND ASSESSMENT**

Assessment is a process used by instructors to help improve learning. Assessment is essential for effective learning because it provides feedback to both students and instructors. A critical step in this process is making clear the course’s student learning outcomes that describe what students are expected to learn to be successful in the course. The student learning outcomes for this course are listed below. By collecting data and sharing it with students on how well they are accomplishing these learning outcomes students can more efficiently and effectively focus their learning efforts. This information can also help instructors identify challenging areas for students and adjust their teaching approach to facilitate learning.

**Course learning objectives:**
Upon completion of this course, students will
1. be able to apply vector mathematics including calculus to analyze mechanical systems.
2. know the basic definitions of position, velocity, acceleration and be able to use them to describe the motion of simple physical systems.
3. be able to state and apply Newton’s Laws to analyze simple mechanical systems involving position and velocity dependent forces for both rectangular and non-rectangular coordinate systems.
4. be able to apply work and energy concepts to solve either problems involving only conservative forces or systems with sliding friction.
5. be able to apply the principle of conservation of linear momentum to solve problems involving isolated systems and collisions.
6. be able to apply conservation of angular momentum to analyze systems either involving collision or in which no net external torque is applied.
7. be able to apply transformation equations to compare measurements made by observers in reference frames.
8. be able to analyze a harmonic system with and without damping or external excitation.
9. be able to state Newton’s Universal Law of Gravity and apply it to solve simple celestial mechanics problems.
10. be able to use generalized coordinates to find the Lagrangian and Hamiltonian of a simple mechanical system.
11. be able to apply Langrangian mechanics to solve for the motion of simple mechanical systems.
12. be able to apply Hamiltonian mechanics to solve for the motion of simple mechanical systems.

G. INSTRUCTIONAL METHODS AND ACTIVITIES
Classes will be held via live video conference among all of the Texas Physics Consortium schools. Students will be able to ask questions during class, and the instructor will see who is asking the question.

H. MAJOR COURSE REQUIREMENTS AND GRADING
Course requirements and grading will be discussed by the instructor during the first class.
According to TAMU-CC Final Examination schedule, the final exam for this course will take place on December 7th, 2018 at 11:00AM-01:30PM

I. COURSE CONTENT/SCHEDULE
The expected content and schedule will be distributed by the instructor during the first class.

Note: Changes in this course schedule may be necessary and will be announced to the class by the Instructor. The assignments and exams shown are directly related to the Student Learning

J. COURSE POLICIES
The course instructor will discuss specific course policies during the first class.

K. COLLEGE AND UNIVERSITY POLICIES

- Academic Integrity (University)
  University students are expected to conduct themselves in accordance with the highest standards of academic honesty. Academic misconduct for which a student is subject to penalty includes all forms of cheating, such as illicit possession of examinations or examination materials, falsification, forgery, complicity or plagiarism. (Plagiarism is the presentation of the work of another as one’s own work.) In this class, academic misconduct or complicity in an act of academic misconduct on an assignment or test will result in a failing grade.

- Classroom/Professional Behavior
  Texas A&M University-Corpus Christi, as an academic community, requires that each individual respect the needs of others to study and learn in a peaceful atmosphere. Under Article III of the Student Code of Conduct, classroom behavior that interferes with either (a) the instructor’s ability to conduct the class or (b) the ability of other students to profit from the instructional program may be considered a breach of the peace and is subject to disciplinary sanction outlined in article VII of the Student Code of Conduct. Students engaging in unacceptable behavior may be instructed to leave the classroom. This prohibition applies to all instructional forums, including classrooms, electronic classrooms, labs, discussion groups, field trips, etc.

- Statement of Civility
  Texas A&M University-Corpus Christi has a diverse student population that represents the population of the state. Our goal is to provide you with a high quality educational experience that is free from repression. You are responsible for following the rules of the University, city, state and
federal government. We expect that you will behave in a manner that is dignified, respectful and courteous to all people, regardless of sex, ethnic/racial origin, religious background, sexual orientation or disability. Behaviors that infringe on the rights of another individual will not be tolerated.

- **Deadline for Dropping a Course with a Grade of W (University)**
  I hope that you never find it necessary to drop this or any other class. However, events can sometimes occur that make dropping a course necessary or wise. *Please consult with your academic advisor, the Financial Aid Office, and me, before you decide to drop this course.* Should dropping the course be the best course of action, you must initiate the process to drop the course by going to the Student Services Center and filling out a course drop form. Just stopping attendance and participation WILL NOT automatically result in your being dropped from the class. Please consult the Academic Calendar ([http://www.tamucc.edu/academics/calendar/](http://www.tamucc.edu/academics/calendar/)) for the last day to drop a course.

- **Grade Appeals (College of Science and Engineering)**
  As stated in University Procedure 13.02.99.C2.01, Student Grade Appeal Procedures, a student who believes that he or she has not been held to appropriate academic standards as outlined in the class syllabus, equitable evaluation procedures, or appropriate grading, may appeal the final grade given in the course. The burden of proof is upon the student to demonstrate the appropriateness of the appeal. A student with a complaint about a grade is encouraged to first discuss the matter with the instructor. For complete details, including the responsibilities of the parties involved in the process and the number of days allowed for completing the steps in the process, see University Procedure 13.02.99.C2.01, Student Grade Appeal Procedures. These documents are accessible through the University Rules website at [http://www.tamucc.edu/provost/university_rules/index.html](http://www.tamucc.edu/provost/university_rules/index.html), and the College of Science and Engineering Grade Appeals webpage at [http://sci.tamucc.edu/students/GradeAppeal.html](http://sci.tamucc.edu/students/GradeAppeal.html). For assistance and/or guidance in the grade appeal process, students may contact the chair or director of the appropriate department or school, the Office of the College of Science and Engineering Dean, or the Office of the Provost.

- **Disability Services**
  The Americans with Disabilities Act (ADA) is a federal anti-discrimination statute that provides comprehensive civil rights protection for persons with disabilities. Among other things, this legislation requires that all students with disabilities be guaranteed a learning environment that provides for reasonable accommodation of their disabilities. If you believe you have a disability requiring an accommodation, please call (361) 825-5816 or visit Disability Services in Corpus Christi Hall 116. If you are a returning veteran and are experiencing cognitive and/or physical access issues in the classroom or on campus, please contact the Disability Services office for assistance at (361) 825-5816. [http://disabilityservices.tamucc.edu/](http://disabilityservices.tamucc.edu/)

- **Statement of Academic Continuity**
  In the event of an unforeseen adverse event, such as a major hurricane and classes could not be held on the campus of Texas A&M University–Corpus Christi; this course would continue through the use of Blackboard and/or email. In addition, the syllabus and class activities may be modified to allow continuation of the course. Ideally, University facilities (i.e., emails, websites, and Blackboard) will be operational within two days of the closing of the physical campus. However, students need to make certain that the course instructor has a primary and a secondary means of contacting each student.
L. OTHER INFORMATION

- Academic Advising

The College of Science & Engineering requires that students meet with an Academic Advisor as soon as they are ready to declare a major. The Academic Advisor will set up a degree plan, which must be signed by the student, a faculty mentor, and the department chair. Meetings are by appointment only; advisors do not take walk-ins. Please call or stop by the Advising Center to check availability and schedule an appointment. The College’s Academic Advising Center is located in Center for Instruction 350 or can be reached at (361) 825-3928.
