Geospatial Software Systems II – GISC 3420.W01/W11
Department of Computing Sciences
Spring 2020

A. COURSE INFORMATION

Course number/section: GISC 3420.W01/W11
Class meeting time: Online
Class location: Online
Course Website: http://bb9.tamucc.edu

B. INSTRUCTOR INFORMATION

Instructor: Hongzhi Song
Office location: CBI 108
Office hours: M 11 – 12 PM (WebEx), M 2 – 4 PM; TR 11:00 – 12 PM
or by appointment
WebEx: https://tamucc.webex.com/meet/hsong
Telephone: 361-825-3198
e-mail: hongzhi.song@tamucc.edu
Appointments: By request. Contact via email to schedule an appointment.

C. COURSE DESCRIPTION

Catalog Course Description
Advanced programming course focusing on the design and implementation of GIS scripts and GIS web applications. Topics covered include GIS web applications, web mashups, GIS scripts, GIS tool creation, and advanced user interface design and implementation. Prerequisite: GISC 2438 Geospatial Software Systems I.

This course is the final programming course in the GISC Program. It is mean to compliment your existing GIS skills by teaching you how to script your actions for automation. Skills learned in this class will easily translate to writing small scripts for data management, manipulation, tool creation, and map production.

D. PREREQUISITES AND COREQUISITES

Prerequisites
GISC 2438 – Geospatial Software Systems I

E. REQUIRED TEXTBOOK(S), READINGS AND SUPPLIES

Recommend Textbook(s)
Horstmann, C & Necaise, R. Python for Everyone. 3rd ed.

Supplies

- Windows Operating System is preferred. A computer which meets the minimum ArcGIS Pro 2.2 system requirements and has the ability to run the software.
- ArcGIS Pro, and/or ArcGIS 10.5 or higher with 3D Analyst and Spatial Analyst. This is provided in lab on campus. If attending online, software will be provided as a download.
- PytonWin or PyScripter - http://code.google.com/p/pyscripter/
- Adobe PDF viewer. (e.g. Adobe Acrobat Reader).
- Web browser with Java Virtual Machine installed.
- Video player able to play MPEG-4 video (Quicktime, VLC, Windows Media Player).
- Speakers/headphones.
- Online students: Microphone and webcam.
- Online students: Consistent, weekly access to high-speed internet.

F. STUDENT LEARNING OUTCOMES AND ASSESSMENT

Assessment is a process used by instructors to help improve learning. Assessment is essential for effective learning because it provides feedback to both students and instructors. A critical step in this process is making clear the course’s student learning outcomes that describe what students are expected to learn to be successful in the course. The student learning outcomes for this course are listed below. By collecting data and sharing it with students on how well they are accomplishing these learning outcomes students can more efficiently and effectively focus their learning efforts. This information can also help instructors identify challenging areas for students and adjust their teaching approach to facilitate learning.

By the end of this course, students should be able to:

1. Apply object-oriented programming concepts.
2. Design and implement solutions in Python to automate geoprocessing tasks
3. Demonstrate an understanding of programming concepts, methods, and approaches such as debugging, error checking, and documentation.
4. Become highly skilled in using ArcPy
5. Utilize modules, and libraries to develop new GIS applications and extend existing applications.

G. INSTRUCTIONAL METHODS AND ACTIVITIES

Online lectures and labs. Students are required to meet with instructor via WebEx.

H. MAJOR COURSE REQUIREMENTS AND GRADING

Student learning outcomes will be assessed through examinations, a number of lab assignments and others. Labs will be graded based on completeness, correctness, and documentation.

Note: Changes in this course schedule may be necessary and will be announced to the class by the Instructor. The detail schedule is available on Blackboard course homepage. The assignments and exams shown are directly related to the Student Learning Outcomes described in Section F.

J. **COURSE POLICIES**

**Note to Online Students.** The lecture and lab materials will be available on Blackboard. It is your responsibility to stay up with the course on track. Assignments will be completed on your home computer and must be submitted digitally to Blackboard on time. You are responsible for installing and testing the software during the first week of class and keeping your home computer in good working order. (The alternative: you may use the computers on campus).

**Late Work and Make-up Exams**
A 10% penalty per day will be applied to late assignments up to one week after they are
due date/time. This means that assignments handed in late on the due date or the next calendar day get a 10% point deduction, for 2 days late this gives a 20% penalty, and so on. Assignments will not be accepted if handed in more than one week (7x24 hours) after the due date/time. If you know in advance that you will be late for an assignment, let the instructor know in advance (via email with an official document), and it will be decided by the instructor whether an exception can be made on a case-by-case basis. Make-up exams are not permitted except for official documentation, exceptional reasons.

**Email**

Consider email as official correspondence warranting professional language. Professional emails include elements such as a short descriptive subject line, salutation, complete inquiry in the body of the message, your full name, and course and section number. Unprofessional emails will result in a non-response and request for proper correspondence.

**Technological Excuses**

Hard drive crashes and other computer woes will not be accepted as excuses for late submission. Students should, given the complexity of the tasks they will pursue, be sure that they maintain adequate backup copies of all aspects of their work. Additionally, plan ahead so that you will have time to use the on-campus computers and printers if necessary. You may NOT submit papers/assignments by e-mail. If for some reason you feel you have to do this, you **must** ask for, and receive, permission ahead of time; furthermore, you may not consider an e-mailed paper/assignment to be submitted until you have received a reply confirming that I have received the paper/assignment.

**Communication about Life Events**

It is the your (student’s) responsibility to keep up with the course instruction, assignments, and examinations. Should a life event interrupt your ability to meet these responsibilities, you must inform the instructor about this as soon as possible and within a reasonable amount of time so that a course of action can be determined. Communicating with the instructor about these life events in an unreasonable time frame is not acceptable and will not change the outcome of missed work nor will it be a valid reason to receive an ‘Incomplete’ designation for the course.

**Originality of Work**

Every exam and lab assignment for this class must be your own work. You may ask for clarification and assistance for figuring out an algorithm, but you may not copy or use anyone else’s code for any reason in this course, unless explicitly stated in a lab assignment or exam.

**Digital Assignment Submission Instructions**

Assignments submitted through the course website must follow the “Assignment Submission Instructions” document posted on the course website. Failure to follow the steps outlined in this document may result in deducted points for the assignment. Assignments submitted through the course website will be returned through the course website.
Tips for Taking an Online Class.
1. Treat an online course like a “real” course.
2. Hold yourself accountable.
3. Practice time management.
4. Create a regular study space and stay organized.
5. Eliminate distractions.
6. Figure out how you learn best.
7. Actively participate.
8. Leverage your network.
Overall: Practice Makes Perfect!

K. COLLEGE AND UNIVERSITY POLICIES

• Academic Integrity (University)
University students are expected to conduct themselves in accordance with the highest standards of academic honesty. Academic misconduct for which a student is subject to penalty includes all forms of cheating, such as illicit possession of examinations or examination materials, falsification, forgery, complicity or plagiarism. (Plagiarism is the presentation of the work of another as one’s own work.) In this class, academic misconduct or complicity in an act of academic misconduct on an assignment or test will result in a failing grade.

• Classroom/Professional Behavior
Texas A&M University-Corpus Christi, as an academic community, requires that each individual respect the needs of others to study and learn in a peaceful atmosphere. Under Article III of the Student Code of Conduct, classroom behavior that interferes with either (a) the instructor’s ability to conduct the class or (b) the ability of other students to profit from the instructional program may be considered a breach of the peace and is subject to disciplinary sanction outlined in article VII of the Student Code of Conduct. Students engaging in unacceptable behavior may be instructed to leave the classroom. This prohibition applies to all instructional forums, including classrooms, electronic classrooms, labs, discussion groups, field trips, etc.

• Statement of Civility
Texas A&M University-Corpus Christi has a diverse student population that represents the population of the state. Our goal is to provide you with a high quality educational experience that is free from repression. You are responsible for following the rules of the University, city, state and federal government. We expect that you will behave in a manner that is dignified, respectful and courteous to all people, regardless of sex, ethnic/racial origin, religious background, sexual orientation or disability. Behaviors that infringe on the rights of another individual will not be tolerated.

• Deadline for Dropping a Course with a Grade of W (University)
I hope that you never find it necessary to drop this or any other class. However, events can sometimes occur that make dropping a course necessary or wise. Please consult
with your academic advisor, the Financial Aid Office, and me, before you decide to drop this course. Should dropping the course be the best course of action, you must initiate the process to drop the course by going to the Student Services Center and filling out a course drop form. Just stopping attendance and participation WILL NOT automatically result in you being dropped from the class. Please consult the Academic Calendar (http://www.tamucc.edu/academics/calendar/) for the last day to drop a course.

- **Grade Appeals (College of Science and Engineering)**
  As stated in University Procedure 13.02.99.C2.01, Student Grade Appeal Procedures, a student who believes that he or she has not been held to appropriate academic standards as outlined in the class syllabus, equitable evaluation procedures, or appropriate grading, may appeal the final grade given in the course. The burden of proof is upon the student to demonstrate the appropriateness of the appeal. A student with a complaint about a grade is encouraged to first discuss the matter with the instructor. For complete details, including the responsibilities of the parties involved in the process and the number of days allowed for completing the steps in the process, see University Procedure 13.02.99.C2.01, Student Grade Appeal Procedures. These documents are accessible through the University Rules website at http://www.tamucc.edu/provost/university_rules/index.html, and the College of Science and Engineering Grade Appeals webpage at http://sci.tamucc.edu/students/GradeAppeal.html. For assistance and/or guidance in the grade appeal process, students may contact the chair or director of the appropriate department or school, the Office of the College of Science and Engineering Dean, or the Office of the Provost.

- **Disability Services**
  The Americans with Disabilities Act (ADA) is a federal anti-discrimination statute that provides comprehensive civil rights protection for persons with disabilities. Among other things, this legislation requires that all students with disabilities be guaranteed a learning environment that provides for reasonable accommodation of their disabilities. If you believe you have a disability requiring an accommodation, please call (361) 825-5816 or visit Disability Services in Corpus Christi Hall 116.

If you are a returning veteran and are experiencing cognitive and/or physical access issues in the classroom or on campus, please contact the Disability Services office for assistance at (361) 825-5816.

http://disabilityservices.tamucc.edu/

- **Statement of Academic Continuity**
  In the event of an unforeseen adverse event, such as a major hurricane and classes could not be held on the campus of Texas A&M University–Corpus Christi; this course would continue through the use of Blackboard and/or email. In addition, the syllabus and class activities may be modified to allow continuation of the course.
Ideally, University facilities (i.e., emails, web sites, and Blackboard) will be operational within two days of the closing of the physical campus. However, students need to make certain that the course instructor has a primary and a secondary means of contacting each student.

L. OTHER INFORMATION

- Academic Advising
  The College of Science & Engineering requires that students meet with an Academic Advisor as soon as they are ready to declare a major. The Academic Advisor will set up a degree plan, which must be signed by the student, a faculty mentor, and the department chair. Meetings are by appointment only; advisors do not take walk-ins. Please call or stop by the Advising Center to check availability and schedule an appointment. The College’s Academic Advising Center is located in Center for Instruction 350 or can be reached at (361) 825-3928.

GENERAL DISCLAIMER
I reserve the right to modify the information, schedule, assignments, deadlines, and course policies in this syllabus if and when necessary. I will announce such changes in a timely manner during regularly scheduled lecture periods.
