Heat Transfer MEEN 3345
Mechanical Engineering
Fall 2019

A. COURSE INFORMATION

Course number/section: MEEN 3345.001
Class meeting time: 9:00-9:50 AM MWF
Class location: O’Connor 117
Course Website:

B. INSTRUCTOR INFORMATION

Instructor: Prof. Jian Sheng
Office location: EN 313
Office hours: 3:00–6:00 pm, MW; others as available or by appt.
Telephone: 361-825-3731
e-mail: jian.sheng@tamucc.edu
Appointments: Direct contact, phone call, or e-mail

C. COURSE DESCRIPTION

Catalog Course Description
(3 sem. hrs. 3:0) Steady and unsteady conduction in one- and two-dimensions; forced convection, internal and external flows; heat exchangers; introduction to radiation; elements of thermal system design.

Extended Course Description
This course is an introduction to heat transfer and covers conduction, convection, and radiation heat transfer. Calculus will be used to solve some of the heat transfer problems in this course.

D. PREREQUISITES AND COREQUISITES

Prerequisites
ENGR 2316 - Thermodynamics and ENGR 3315 - Fluid Mechanics

Corequisites
None.

E. REQUIRED TEXTBOOK(S), READINGS AND SUPPLIES

Optional Textbook(s) or Other References: None
Supplies: None.
F. STUDENT LEARNING OUTCOMES AND ASSESSMENT

Assessment is a process used by instructors to help improve learning. Assessment is essential for effective learning because it provides feedback to both students and instructors. A critical step in this process is making clear the course’s student learning outcomes that describe what students are expected to learn to be successful in the course. The student learning outcomes for this course are listed below. By collecting data and sharing it with students on how well they are accomplishing these learning outcomes students can more efficiently and effectively focus their learning efforts. This information can also help instructors identify challenging areas for students and adjust their teaching approach to facilitate learning.

By the end of this course, students should be able to:

1. Compute quantities associated with heat transfer via steady-state conduction in one and two dimensions.
2. Compute quantities associated with transient heat transfer via conduction.
3. Compute quantities associated with heat transfer via forced and free convection.
5. Compute quantities associated with radiative heat transfer.

G. INSTRUCTIONAL METHODS AND ACTIVITIES

Course will be based primarily on lecture, quizzes, tests, and the final exam. Weekly homework quizzes will be given to review progress on homework and learning in general.

H. MAJOR COURSE REQUIREMENTS AND GRADING

Suggested homework problems will be assigned. Weekly homework will be given to judge progress, and these will be worth 20% of the final course grade. Three in-class tests will be given and these will count 54% of the final course grade. The comprehensive final exam will count for 26% of the final course grade.

**Final exam**: Wednesday, 11:00 am – 1:30 pm

Note: Changes in this course schedule may be necessary and will be announced to the class by the Instructor. The assignments and exams shown are directly related to the Student Learning Outcomes described in Section F.

J. COURSE POLICIES

**Attendance/Tardiness**
Attendance will be taken on a daily basis. Students are expected to arrive on time for the beginning of the class. Each student is responsible for what takes place in class each day, whether or not the student is present.

**Late Work and Make-up Exams**
The only graded exercises in the class will be the in-class quizzes, the three tests, and the final exam. No make-up quizzes will be given; quizzes missed due to absences will be
the dropped quiz scores. Tests missed as a result of unexcused absences will result in a score of zero. Under most circumstances, the final exam grade will be substituted for tests missed due to excused absences. The absence must be excused in advance except in case of extreme emergency. No makeup exams will be given, except under unusual circumstances and entirely at the discretion of the instructor.

Cell Phone Use
Cell phones should be turned off and put away during class.

Laptop Use
Laptops should be turned off during class, unless a student is using the electronic form of the textbook. Laptops may be used during tests if the student has only the electronic form of the book. These students should sit on the front two rows of the classroom during tests and the final exam.

Missed Exam
See “Late Work and Make-up Exams,” above.

Communications
All outside-of-class communications will be conducted through the message and e-mail functions of the Blackboard site for the class. Each student should make sure his or her preferred e-mail address is the one in the Blackboard system, and each student should check e-mail and the Blackboard message site regularly.

K. COLLEGE AND UNIVERSITY POLICIES

- Academic Integrity (University)
  It is expected that university students will demonstrate a high level of maturity, self-direction, and ability to manage their own affairs. Students are viewed as individuals who possess the qualities of worth, dignity, and the capacity for self-direction in personal behavior.
  See Full University Policy at http://catalog.tamucc.edu/content.php?catoid=10&navoid=313#Academic_Integrity

- Deadline for Dropping a Course with a Grade of W (University)
  The grade of W will be assigned to any student officially dropping a course by Friday, November 11, 2016. No student is eligible to receive a W without completing the official drop process by this deadline. Visit the Office of the University Registrar for the Course Drop Form that must submitted. After November 11, 2016, a student will not be allowed to drop a course.

- Grade Appeals (College of Science and Engineering)
  As stated in University Procedure 13.02.99.C2.01, Student Grade Appeal Procedures, a student who believes that he or she has not been held to appropriate academic standards as outlined in the class syllabus, equitable evaluation procedures, or appropriate grading,
may appeal the final grade given in the course. The burden of proof is upon the student to
demonstrate the appropriateness of the appeal. A student with a complaint about a grade
is encouraged to first discuss the matter with the instructor. For complete details,
including the responsibilities of the parties involved in the process and the number of
days allowed for completing the steps in the process, see University Procedure
13.02.99.C2.01, Student Grade Appeal Procedures. These documents are accessible
through the University Rules website at
http://www.tamucc.edu/provost/university_rules/index.html, and the College of Science
and Engineering Grade Appeals webpage at
http://sci.tamucc.edu/students/GradeAppeal.html. For assistance and/or guidance in the
grade appeal process, students may contact the chair or director of the appropriate
department or school, the Office of the College of Science and Engineering Dean, or the
Office of the Provost.

- **Disability Services**
  The Americans with Disabilities Act (ADA) is a federal anti-discrimination statute
  that provides comprehensive civil rights protection for persons with disabilities. Among other things, this legislation requires that all students with disabilities be
guaranteed a learning environment that provides for reasonable accommodation of
their disabilities. If you believe you have a disability requiring an accommodation,
please call (361) 825-5816 or visit Disability Services in Corpus Christi Hall 116.

If you are a returning veteran and are experiencing cognitive and/or physical access
issues in the classroom or on campus, please contact the Disability Services office
for assistance at (361) 825-5816.

**GENERAL DISCLAIMER**
I reserve the right to modify the information, schedule, assignments, deadlines, and course
policies in this syllabus if and when necessary. I will announce such changes in a timely
manner during regularly scheduled lecture periods.
